SAN FRANCISCO BURNED DISTRICT

LIMIT OF BURNED DISTRICT

PLAIN FACTS

The public must not conclude, from the graphic descriptions and many scenes of the burned district, that the beautiful Golden Gate city has been entirely destroyed. In fact the residence district west of Van Ness Avenue and in the direction of Golden Gate Park and the Presidio, remains practically intact. The new San Francisco will be grander and more beautiful.

THE MIGHTY TRAGEDY

6-18331

A PICTURE GALLERY SHOWING THE HAVOC OF EARTHQUAKE AND FLAMES

"Supreme Pacific wonder, fair goddess of the Gate,
The world has paid you honor, the world bemoans your fate."

WITH the gray dawn of the 18th of April, 1906, a catastrophe without a modern equal fell upon the Pacific Coast. In that monumental disaster San Francisco, the gay and magnificent metropolis was practically blotted out. Shattered and crushed and wrecked by an appalling earthquake convulsion, with telephone, telegraph, water systems and all the cunning adjustments of a twentieth century civilization shattered almost in an instant, the beautiful and helpless city was then engulfed and ravaged by flames. Through three awful days and nights the inhabitants fought for life and property; then the incalculable tragedy was ended. The Queen of the Golden Gate lay in ashes. Three hundred thousand persons stood under the dark and cloudy sky, poverty stricken and homeless, fully one thousand lives had perished according to the most reliable estimates. Thousands had suffered irreparable injury of body and mind; one of the hugest cataclysms of all history was consummated. In the holocaust, property valued at $300,000,000 was turned to dust and ashes, and measureless loss was suffered in the destruction of schools, libraries and works of art. The living generation of men received its greatest shock and a new marvel of disaster was added to history. Of this grand tragedy photographs were taken during its progress and afterwards. In the pages that follow many of these will be found, reproducing scenes of the never to-be-forgotten days of San Francisco's destruction by earthquake and fire. Added to the mighty drama there were other towns that did not escape the havoc wrought by Nature's destructive forces: San Jose, Napa, Santa Rosa, Oakland and other centers of art and beauty with their fair homes were shattered and swept away. Leland Stanford, Jr., University, one of the world's greatest centres of education, was also destroyed. Graphic pictures of all these with appropriate descriptions, will be found in this superb collection.

The Men of the Hour Who Proved to be Equal to the Emergency.

1. **GEORGE C. PARDEE, Governor of California.**—Elected on Republican ticket, 1902 by a plurality of 2,553. Total vote 304,481.

2. **EUGENE E. SCHMITZ, Mayor of San Francisco.** — Now serving his second term. Elected by the Union Labor Party.

3. **JAMES D PHELAN, Ex-Mayor San Francisco.**—(1896-1902.) Chairman Relief Com., who gave $1,000,000 to sufferers.

4. **BRIGADIER GENERAL FUNSTON.**—The brilliant Philippine officer in charge of the military, who did such excellent service.

THE PALACE HOTEL, SAN FRANCISCO.—Before the Earthquake; now a total wreck. This beautiful hotel, known by travelers the world over was built in the 70s, by James Ralston at a cost of $1,000,000 and was owned by the Sharon estate. It was the home of many wealthy families and the loss in art treasures was great. The interior fittings were of marble and rosewood and the spacious interior court with its marble columns and graceful arches, presented a picture of magnificence and splendor, attracting people from all parts of the globe.

RUINS PALACE HOTEL, SAN FRANCISCO.—A famous landmark that was one of the largest structures dedicated to the needs of the traveling public. The Empire Parlor, the Louis XV Parlor, Palm Room with Billiard and Pool tables for ladies, the Gentlemen's Grill were a very few of the features that made the Palace famous. The Grand and Palace Hotels were connected by a covered bridge and consisted of 1500 rooms and 900 bath rooms. The value of the property at time of fire was estimated at about a million and a half dollars.

RUINS OF THE CITY HALL AND HALL OF RECORDS, MARKET STREET, SAN FRANCISCO.—This imposing group of structures known as the City and County buildings, situated between Larkin, McAllister and Grove streets, erected at a cost of $7,000,000 is a total loss. The principal records were fortunatly rescued and deposited in the cemetery vaults for safe keeping.

"THE BIVOUAC OF THE DEAD."—No last bugle call, no muffled drums to beat a sad tattoo, no pomp or ceremony followed the thousands of dead to "fame's eternal camping ground," but divested of the last sacred rites, stripped even of the decencies of Christian burial, millionaire and pauper, rich and poor, shared the same common grave. Their summons had come to "join the innumerable caravan that moves to the pale realm of shades, where each shall take his place in the silent Halls of Death."

MARKET STREET, SAN FRANCISCO.—Before the earthquake. Looking from Lotta's Fountain, the imposing Tower of the Oakland Ferry can be seen in the distance, towering over miles of ruins and acres of debris. The clock in this tower stopped April 18, with the hands pointing to 5.16 A. M. the exact moment of the appalling disaster. The buildings located on the left, are the Examiner, and Chronicle and the Call on the right of Market Street.

RUINED MARKET STREET, SAN FRANCISCO.—Showing the long procession of hungry, homeless, penniless refugees on their way to the Oakland Ferry. The first rush of the escaping multitudes was made up of a motely crowd of barefooted, nightgowned, shivering women, screaming children and ashen-faced men. For forty-eight hours this seemingly endless procession of terror stricken people crowded through the debris in a wild anxiety to escape from the doomed city.

THE UNKNOWN DEAD.—"O why should the spirit of mortal be proud? Like a swift fleeing meteor, a fast flying cloud, he passes from life to the rest of the grave." In sackcloth and ashes the city mourns for her dead. In the ruined streets the flower of youth and the glory of age, lay stark and stiff, unknown and unidentified with "eyes that have all the seeming of a demon's that is dreaming." The most pathetic feature of the calamity was the hundreds of dead bodies buried in the debris and fallen buildings.

PANORAMA, FROM NOB HILL, SAN FRANCISCO—Overlooking the burning of the business district. A mighty and awe-inspiring spectacle lighting up the darkness of night with sheets of flame which tinged the midnight sky in a blaze of fire visible for over forty miles at sea, a sight that will linger in the minds of the multitude of refugees, until death alone blots it from their memory.

BURYING CHARRED REMAINS, SAN FRANCISCO. — A gruesome but common sight in the streets of the wrecked and ruined city. The actual number of the dead will never be known. Hundreds of unidentified dead were buried in the streets and parks, while loved ones in all parts of the world were still anxiously waiting for the tidings which will never come.

A GENERAL VIEW AFTER THE EARTHQUAKE, SAN FRANCISCO.—The city is located on a peninsula, separated from the main land by San Francisco Bay, one of the finest harbors in the world. This bay connects with the Pacific Ocean by the famous Golden Gate Strait The original name of the city was Yerba Buena, Spanish for "good herb," but it was changed to its present name, which is Spanish for Saint Francis, in 1847.

RUINS OF THE COURT HOUSE, SAN FRANCISCO.—Another view of this historical building showing the skeleton steel work of the immense tower stripped of its masonry, the dome still standing intact. Among the debris can be seen many curiosity seekers. The probabilities are that the ruin will have to be razed to the ground before the building can be rebuilt. This structure was in course of construction for twenty years and covered four acres. The Lick statuary fronting the hall represented four periods in the history of California

WELLMAN PECK & CO. BUILDING, WHOLESALE GROCERS, ON EAST STREET, SAN FRANCISCO, CALIF. —For forty miles the white clouds of smoke and lurid tongues of flame could be seen against the background of night, presenting a superb yet terrible spectacle. Piles of brick and stone blocked the streets. Miles of empty houses from which all had fled, stood, sentinel like, over the field of the dead and dying. Through the passable streets rumbled the wheels of the morgue wagons, while occasionally above the roar of the flames could be heard the shouts of the officers as they urged on the brave boys in blue.

WEST FROM MARKET AND FIRST STREETS, SAN FRANCISCO.—"Every little helps. Throw a Brick." This is the sign that meets the eye of every passer through this narrow outlet. Even one brick thrown aside from the passageway by each pedestrian would soon clear the street of its debris. Many of the vehicles using this road bore the mystic sign of the red cross which gave the right of way over all other conveyances. The picture shows a soldier in a confiscated automobile engaged in the noblework of rescue

VIEW FROM VAN NESS AVENUE NEAR MARKET STREET, SAN FRANCISCO. – City Hall dome showing in the distance. Van Ness street running north and south is one of the widest streets in the world, 141 feet with 22 foot side walks. At one time it was the only ray of hope of those living west of this avenue as its extreme width was believed sufficient to stop the fire even if all other means failed.

VIEW SOUTH OF MARKET STREET, SAN FRANCISCO, CALIF.—Brick and stone and steel, symbols of strength and power in the presence of the forces of Nature become as brittle as glass, as pliable as lead and as soft and yielding as sand. Here on Market street in the heart of Nature's battlefield, pavements crumbled and crunched like sugar, brick chimneys and walls fell like so much powder while steel and iron skyscrapers collapsed like kindling wood.

APARTMENT HOUSE DISTRICT, BUSH AND PINE STREETS, SAN FRANCISCO.—Among other splendid apartment houses which were destroyed are the following On PINE ST. the Colonial Loma and Buena Vista. GEARY ST., St. Augustine, Alexandria and Victoria. SUTTER ST., The Pleasanton. Waldeck Grenada and Aberdeen. ELLIS ST.. The Hamilton, Dufferin, Ellis, Royal. Ascott and St. Catherine. O'FARRELL ST., The Eugene, St. George, Knox, Ramon and Gotham

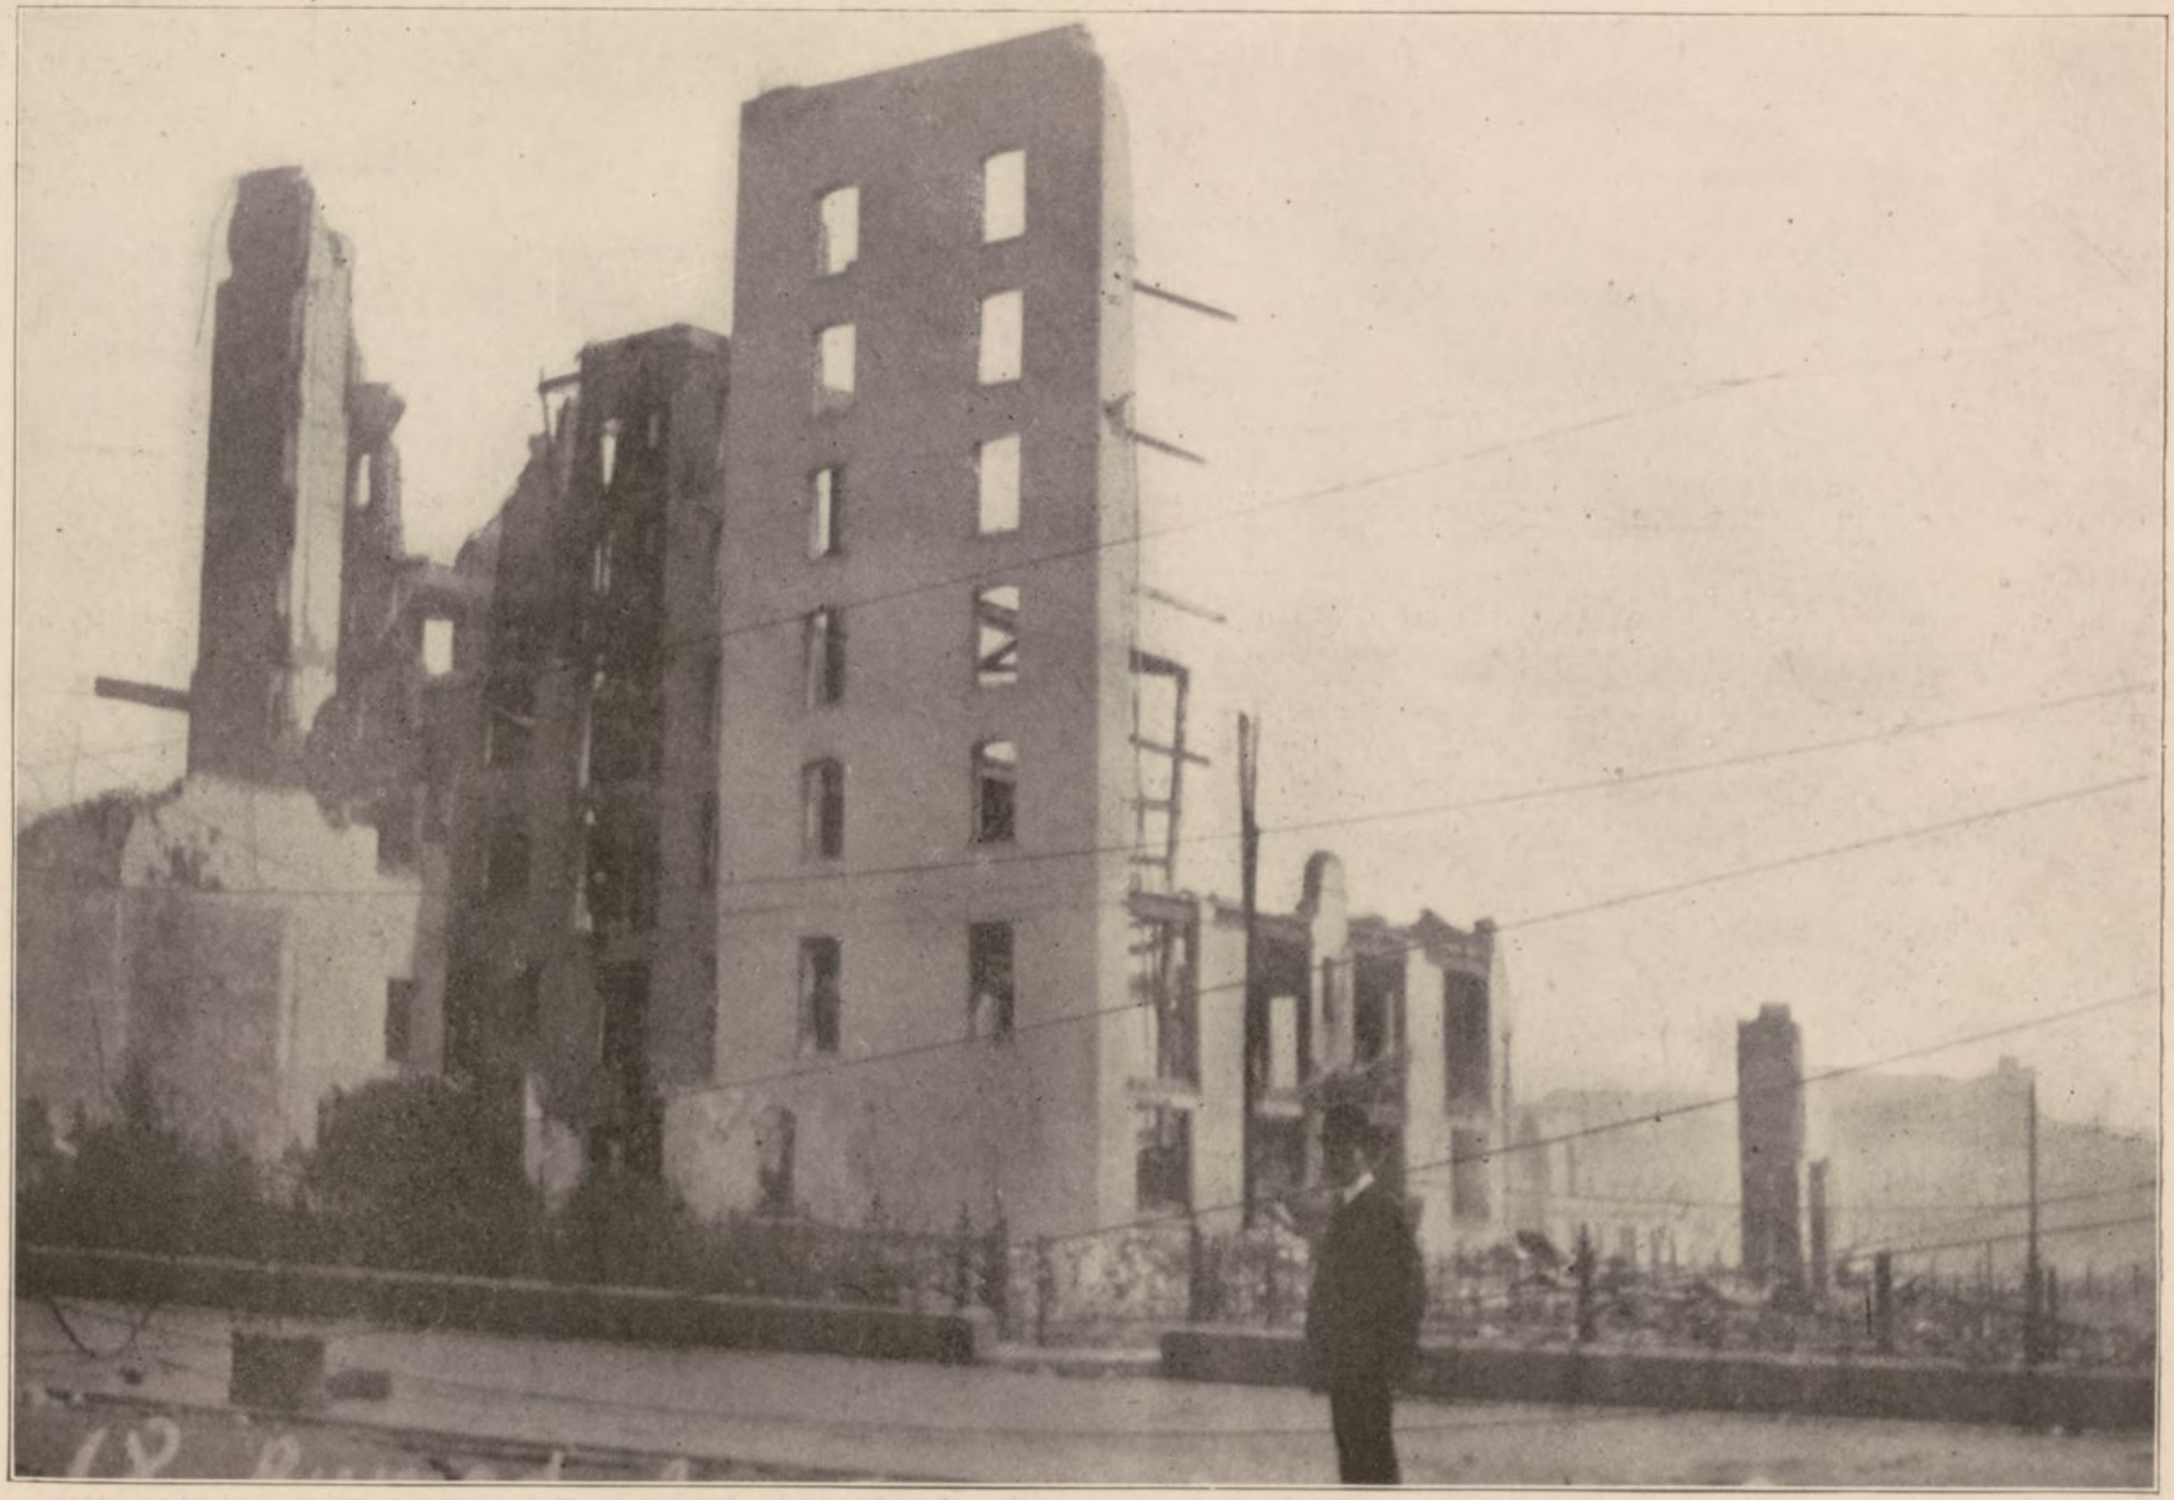
RUINS OF ST, DUNSTAN APARTMENT HOUSE, SAN FRANCISCO, CALIF, — One of the city's famous apartment houses. The Abbey on Taylor street, the Abbottsford on Eddy street, the Netherlands on Turk street, the Savoy on Polk street, and the Plymouth on Bush street. were other noted landmarks that have been destroyed in the apartment house districts.

THE MISSION DOLORES, SAN FRANCISCO.—The adobe building was erected in 1776 and was not damaged by the earthquake, but the new structure, shown to the right, was totally demolished. The old adobe building has witnessed many a quake but has withstood them all. It was the nucleus of the old town of Yerba Buena long since destroyed. A fair sample of the many missions on the coast.

MARK HOPKINS ART INSTITUTE, SAN FRANCISCO, IN RUINS.—All that remains of this beautiful structure with its almost countless treasures. Built by Mark Hopkins, located on Nob Hill near the Stanford, Huntington, Flood and Crocker mansions and owned by the University of California. The Bohemian Club also lost many valuable paintings, among them a dozen pictures by the old masters, valued at $100,000 each, besides dozens of smaller and less valuable paintings.

CAMP OF REFUGEES, AROUND FORT MASON, SAN FRANCISCO.—Over 300,000 refugees fled through the streets and parks the first week of the awful calamity. Without money, food or even water to drink, many with hardly enough clothing to decently cover themselves, wandered aimlessly throughout the stricken city. Many found shelter in the parks and cemeteries, the millionaire jostling elbows with the day laborer, the mistress with her maid and the professional man with the tradesman, all reduced to one common level of hunger and suffering

RUINS AT MISSION AND SEVENTH STREETS, SAN FRANCISCO.—Showing the bulging of the earth at one corner of the New Federal Building. Depression of the surface following an earthquake is a common occurrence but it is not so frequent, that the surface is elevated. A downward displacement of the crust is the usual physical result.



RUINED APARTMENT HOUSE, VAN NESS AVENUE, SAN FRANCISCO.—The finest apartment houses, the handsomest private residences, together with the ramshackle tenement of the foreign resident, were licked up in the scorching blast of fire and flame. Mansion and palace, hovel and hut, were alike consumed with all that they contained. Over 60,000 structures were reduced to ashes in this great holocaust of nearly a thousand lives.

SANTA CLARA MISSION, EXTERIOR VIEW.—This quaint structure has long been one of the most interesting features on the coast. It is now connected with the Santa Clara College. The picture on the opposite page shows a splendid view of the interior.

SANTA CLARA MISSION, INTERIOR VIEW.—This splendid picture shows the interior of one of the oldest and most picturesque of the mission churches along the Pacific Coast. It is in a good state of preservation, and escaped material damage during the awful earthquake and fire of April 18 and 19, 1906. The old Fathers built, perhaps, better than they knew as many Missions have withstood hundreds of earthquakes.

RUINS OF A LINE OF STREET CARS, SAN FRANCISCO.—Caught in the San Francisco fire. The wholesale districts, the downtown retail part of the city and the banking and insurance districts have been wiped off the map. Many of the dead were temporarily buried in the streets while others were consumed in smouldering wrecks, and burning skyscrapers—the most colossal funeral pyre of modern civilization.

ASPHALT PAVEMENT, VAN NESS AVENUE, SAN FRANCISCO.—Showing the pavement rent asunder, a piece of it standing on end. One of the freak results of the earthquake. The destructive effects of earthquakes are not so much due to the amplitude of the vibrations as to the high velocity of the undulatory impulses.

REFUGEES AT THE FERRY, SAN FRANCISCO.—Bound for Oakland. The crush at this ferry was simply indescribable. Women in gala attire, men in evening dress, others clad in their night robes, jostled and crowded against Chinese, Italian laborers and denizens of the Barbary Coast, each anxious to be the first to leave the city of doom and destruction.

VIEW ACROSS FOURTH STREET, SAN FRANCISCO, AFTER THE EARTHQUAKE.—Ruins of the Pioneer Building in the right foreground. Among the famous structures that were wrecked are the new Flood building built by James Flood at a cost of $4.000,000; the new Merchant's Exchange, California street, cost $2,500.000; Crocker Building, Montgomery and Market streets, $1,000,000. Mills Building, Bush and Montgomery streets, $1,000,000; Shreve Building, Post street and Grand avenue, $2,000,000.

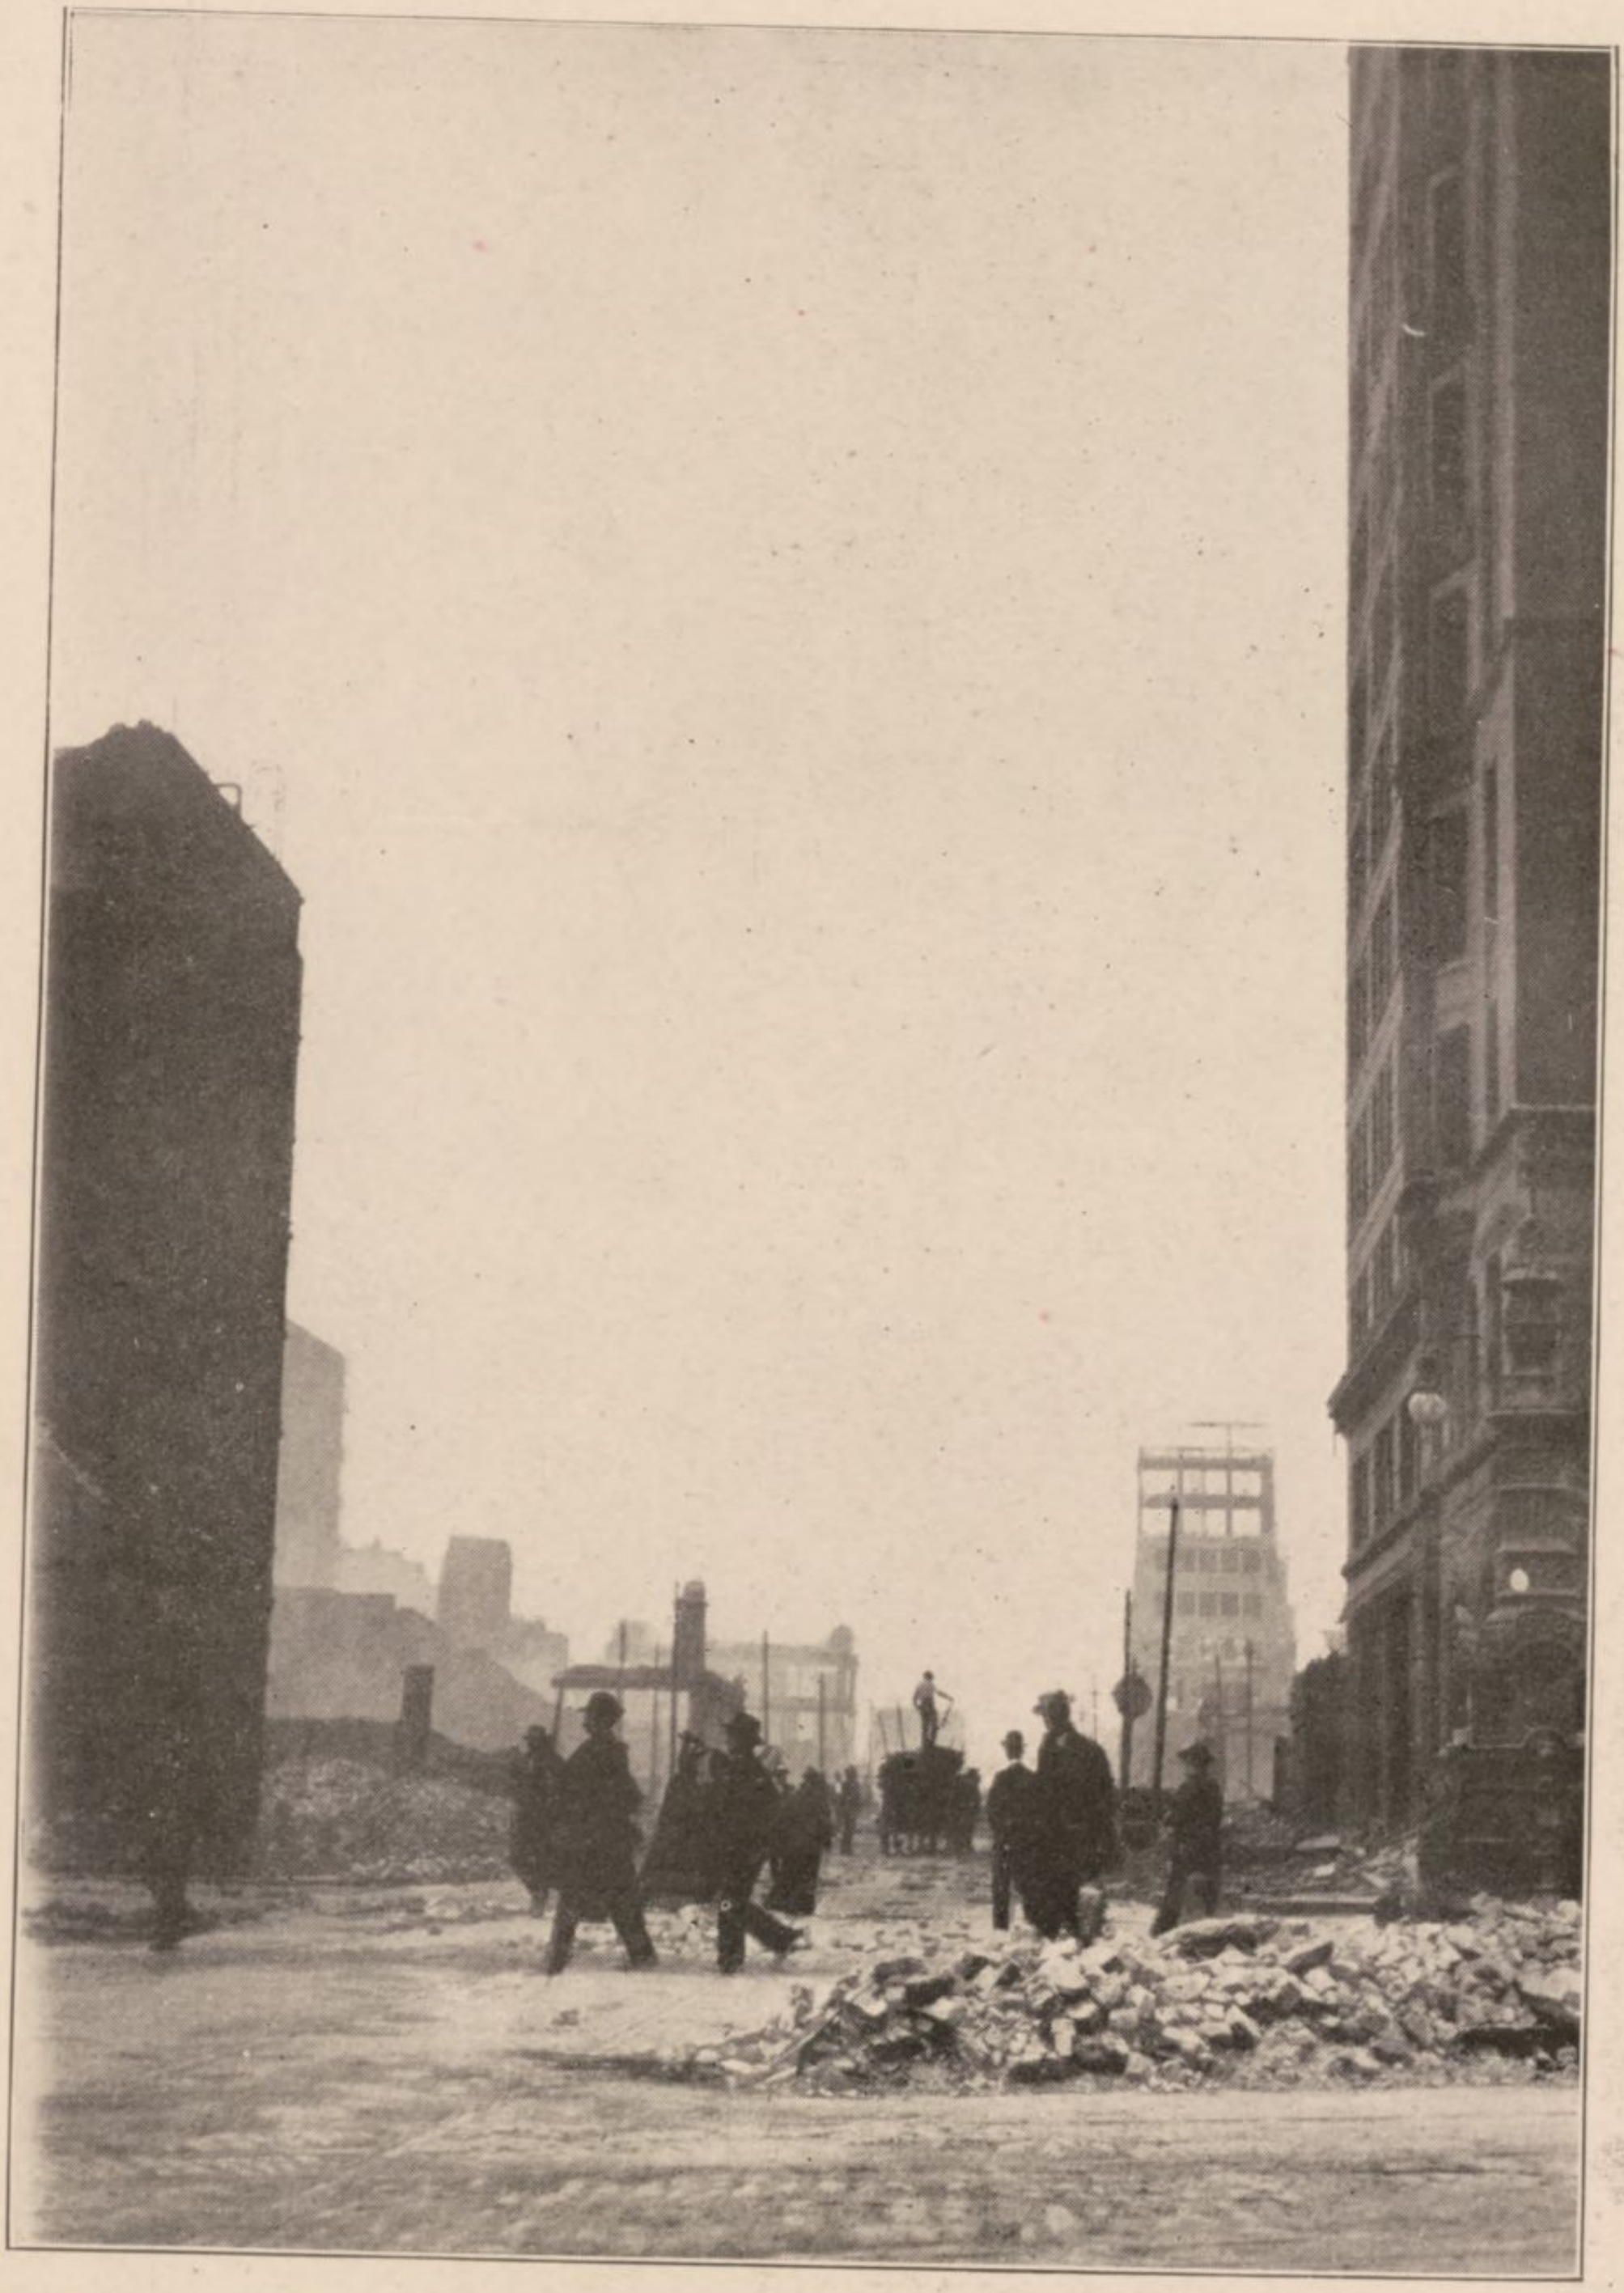
VIEW SOUTH OF MARKET STREET, SAN FRANCISCO, SHOWING THE FIRE.—The burning of Rome fades into insignificance in comparison with the field of fire which swept over this modern city of the Argonauts. No Nero could add to the fear of the terror stricken inhabitants. Rome, Pompeii, Chicago, Johnstown, and Galveston with their fires and floods seem but dreams in the face of the awful fiery devastation which swept over acres and miles of costly mansions and palaces. Thirst, hunger, disease, poverty and terror—these are a few of the specters which loomed up out of the walls of flame and death.

FIFTH AND HOWARD STREETS, SAN FRANCISCO.—"Have the gates of death been opened unto thee? Or hast thou seen the doors of the shadow of death?" Thus spoke Job in his affliction and thousands of the terrified citizens of San Francisco might have truthful answered the question in the affirmative. Everywhere schools, hospitals, churches, prisons, offices and homes lay in ruins, while thousands of once wealthy men and women must again begin the struggle for an existence with naked hands.

RUINS, VALENCIA HOTEL, SAN FRANCISCO.—A four story frame structure that stood on Valencia Avenue near Market Street. In the ruins of this building many bodies were found Among other Hotels that were destroyed are the Occidental on Montgomery Street, the Palace, St. Francis, California, Grand, Granada and Winchester. In the re-building of the city, the problem of housing and boarding the thousands of workers will be a serious one but no problem will prove serious enough to interfere with the cities restoration.

TAYLOR AND GEARY BUILDING, SAN FRANCISCO.—Interior view of the ruins. One of the hundreds of prominent structures which were wrecked. One of the first examples of pretentious architecture in the business district, and one of the first structures to be destroyed was the Phelan Building on Market Street. Fortunately, the Government Mint on Fifth street, near Market, was not wrecked, although considerably damaged. Its escape was due to the fact that it was surrounded by a large square and separated from other buildings.

RUINS OF THE CHURCH OF THE ADVENT (EPISCOPAL), ELEVENTH STREET NEAR MARKET, SAN FRANCISCO.—All that is left of this once beautiful edifice. Among other churches which are ruined are St. Luke's Episcopal Church, Van Ness avenue and Clay street; St. Ignatius Cathedral and College, between Van Ness avenue and Franklin street, cost $2,000,000, and St. Dominic's Church and Monastery, Pierce street; also parochial house, loss $300,000.



LOOKING NORTH ON KEARNEY STREET, FROM MARKET, SAN FRANCISCO. — The famous bronze drinking fountain presented to the city by the once noted actress, Lotta, is shown on the right. San Francisco offers an example of a complete modern city suddenly thrown back into the most primitive conditions of human life. All the elaborate developments of a highly cultured civilization were swept away in less than a day and a night.

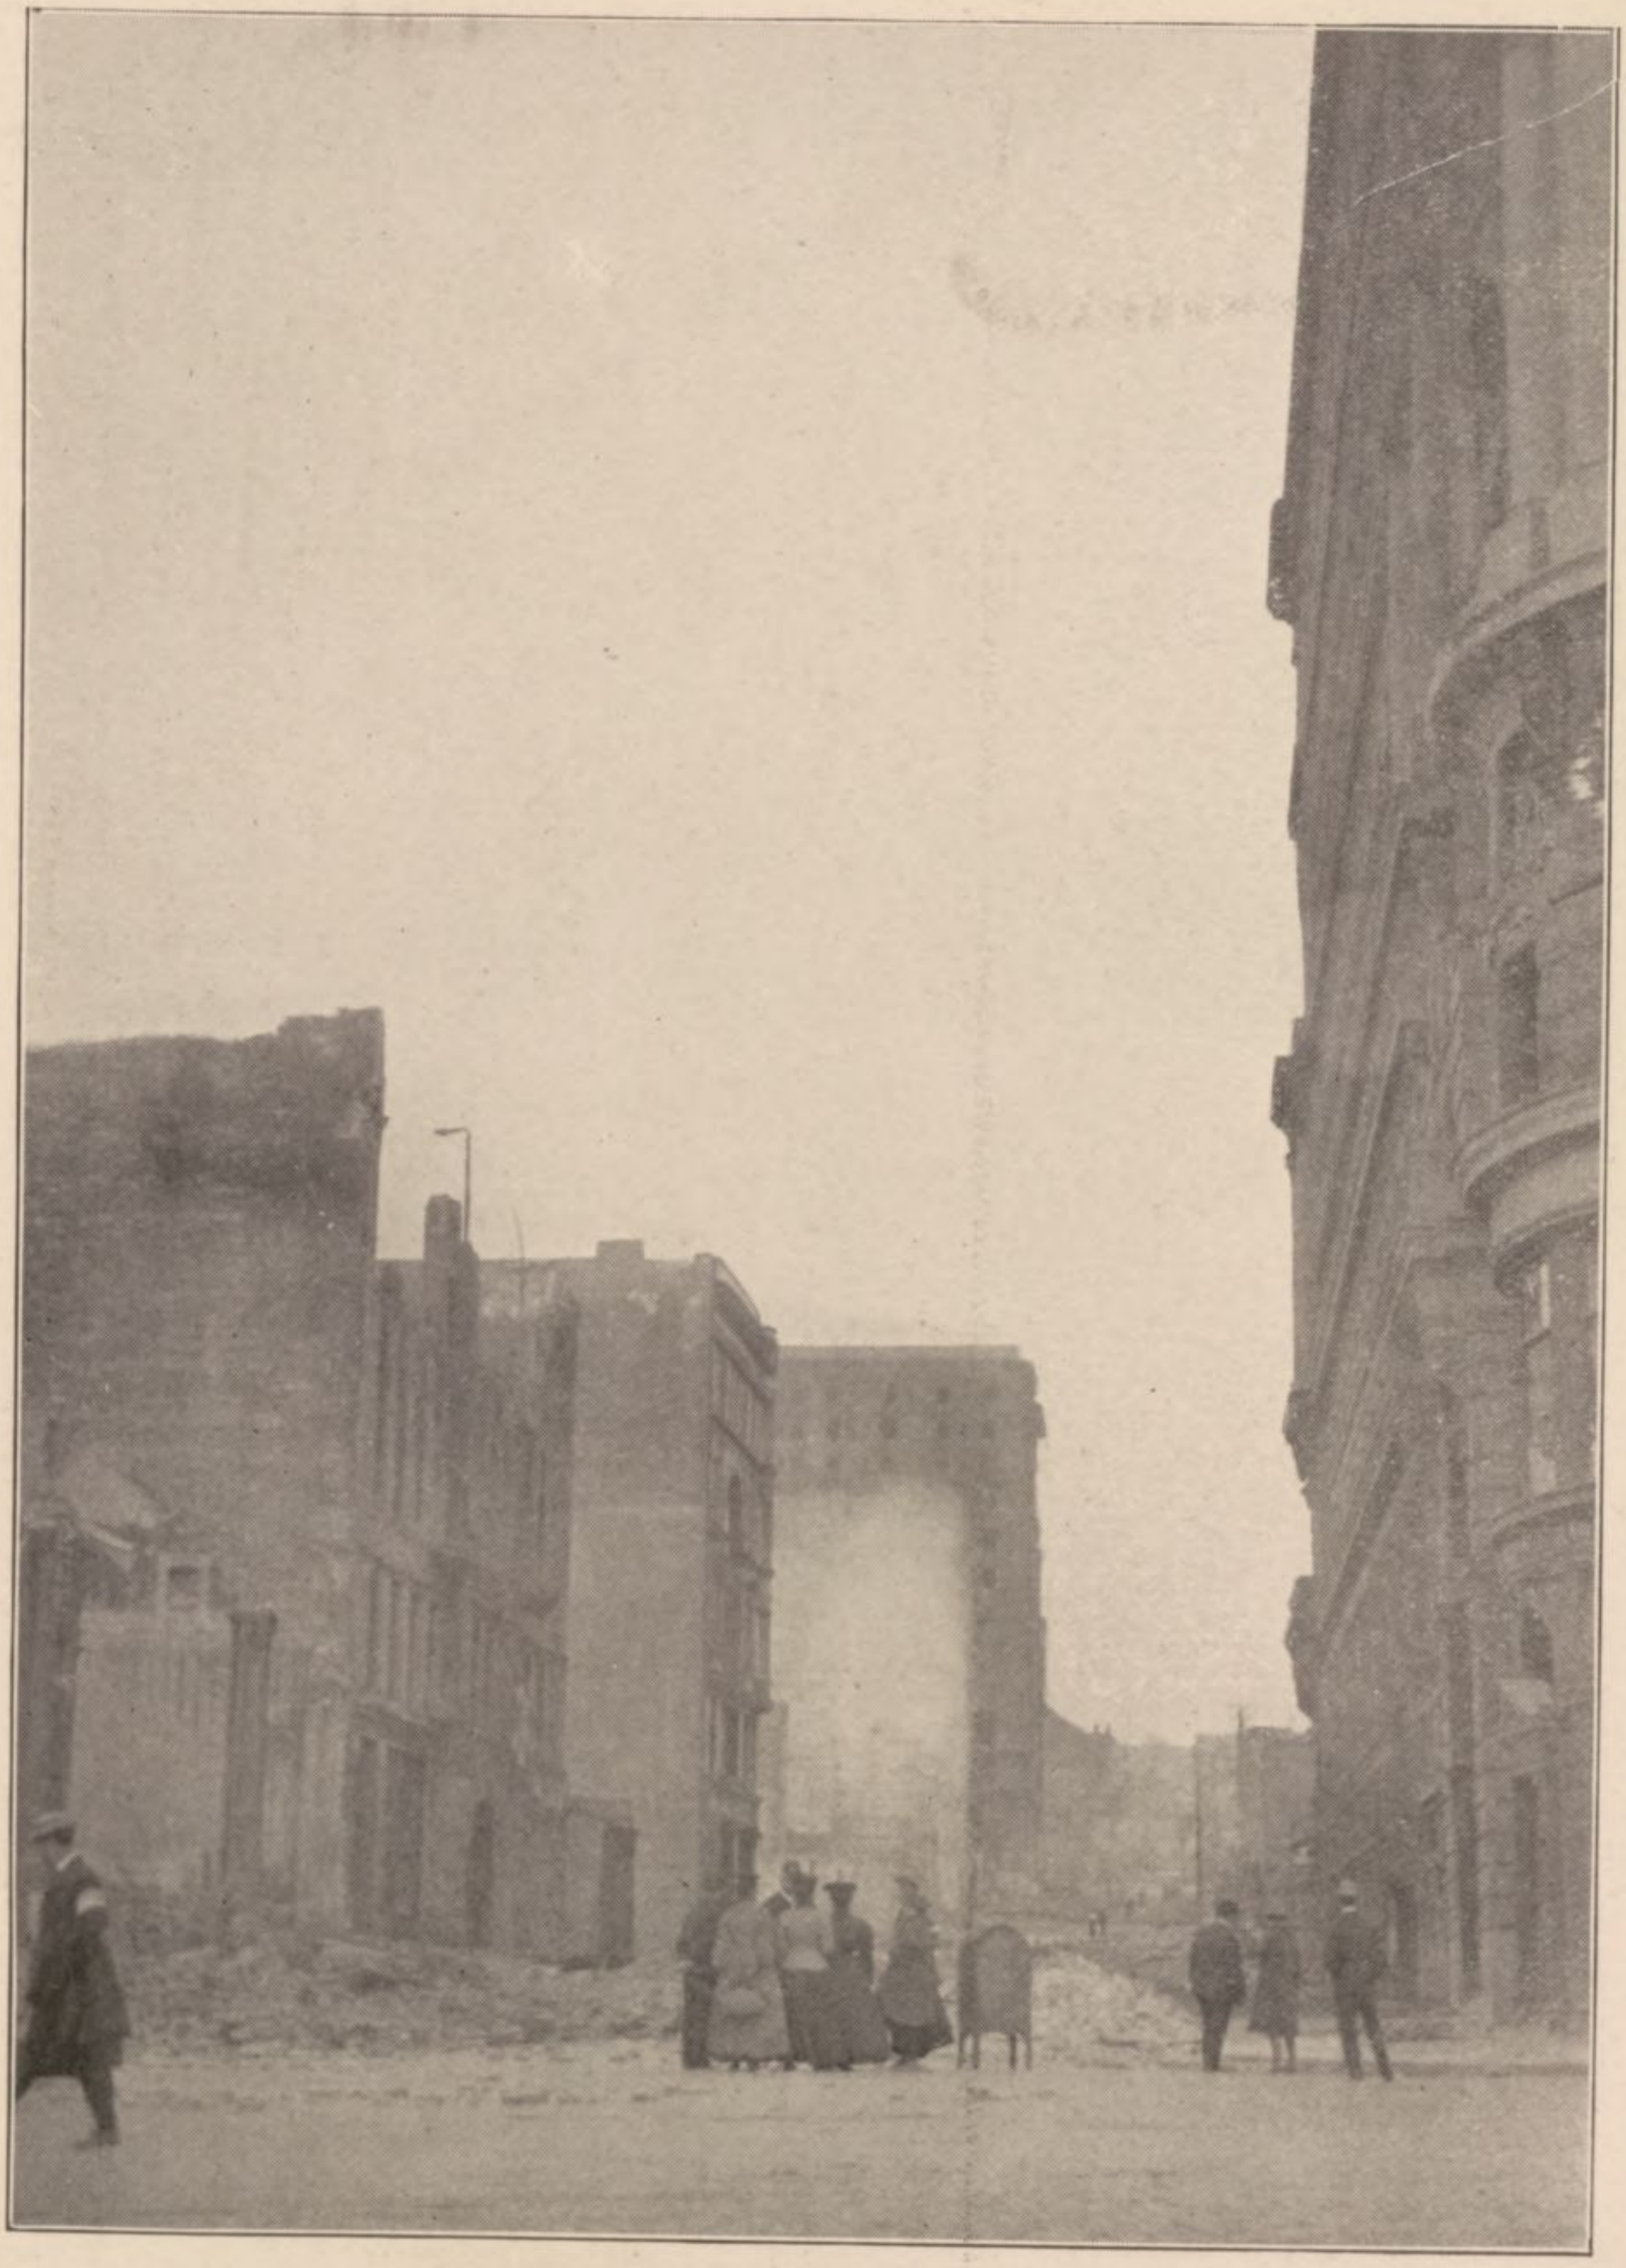
VIEW FROM THIRD AND MARKET STREETS, SAN FRANCISCO.—The Hearst Building shown in the center, and the Call Building on the right. Calamity is rapidly being turned into opportunity, and the business men of San Francisco are speedily preparing for the construction of a new Golden Gate metropolis. Fire has undone the architectural mistakes of the past, making possible the future City Beautiful. A new city hall a new hall of records, fifty new school houses, fifty new fire houses, and a new water and sewer system will be provided for immediately. These improvements, with the repaving of the streets, will cost at least $100,000,000.

THE CALL BUILDING, SAN FRANCISCO.—East view of Market street, from Fifth street. At the junction of Kearney, Market and Geary streets stood the three great newspaper buildings. The Call, the most conspicuous structure in the city, was seventeen stories high Across the street was the Examiner building, while to the north on the opposite side of Market street, was the Chronicle, a modern ten-story structure with a sixteen-story annex under construction. The Post and Bulletin were located two blocks north on Kearny street. All were destroyed in the fearful conflagration.

SOUTHEAST VIEW FROM JUNCTION TURK, MASON AND MARKET STREETS, SAN FRANCISCO.—Showing Native Sons' Statue in the center. Soldiers and police, without hesitation, stopped all able-bodied men and compelled them to assist in the work of rescue or in clearing the streets of debris. Those who refused quickly changed their minds when they felt the prick of the bayonet or witnessed the readiness displayed in shooting down those who instantly failed to obey all orders.

LOOKING WEST FROM MARKET STREET FERRY, SAN FRANCISCO.—The space shown in the picture is over a block in width—the widest open area in the city outside of the squares and parks. Traveling along the north line of Brannan, the fire ate its way to Second street, thence moved along the west side of Second to Townsend and along the north line of Townsend to Seventh. At Fourth and Townsend it took the great building of the Southern Pacific, formerly the main office of this system under the Huntington regime.

NORTH VIEW ON MARKET BETWEEN SIXTH AND SEVENTH STREETS, SAN FRANCISCO, — Showing the wreck of a noted hotel in the rooming-house district. The building boom that has already been inaugurated in the stricken city will draw capital and labor from all parts of the United States. With the opening of the Orient and the completion of the Panama Canal, the future growth of the city is assured. In the rebuilding of the Golden Gate City a lesson will undoubtedly be drawn from Japan and other countries afflicted by earthquakes.



POWELL STREET, SAN FRANCISCO. — Looking north. California Safe Deposit Company Building on the corner. Showing soldiers standing guard over the millions locked up in the vaults. By order of the city officials all safes and bank vaults were forbidden to be opened during the fire and panic. Fortunately not one dollar in actual money locked up in the bank vaults was lost and eastern bankers as well as the Secretary of the National Treasury rapidly came to the assistance of the San Francisco banks.

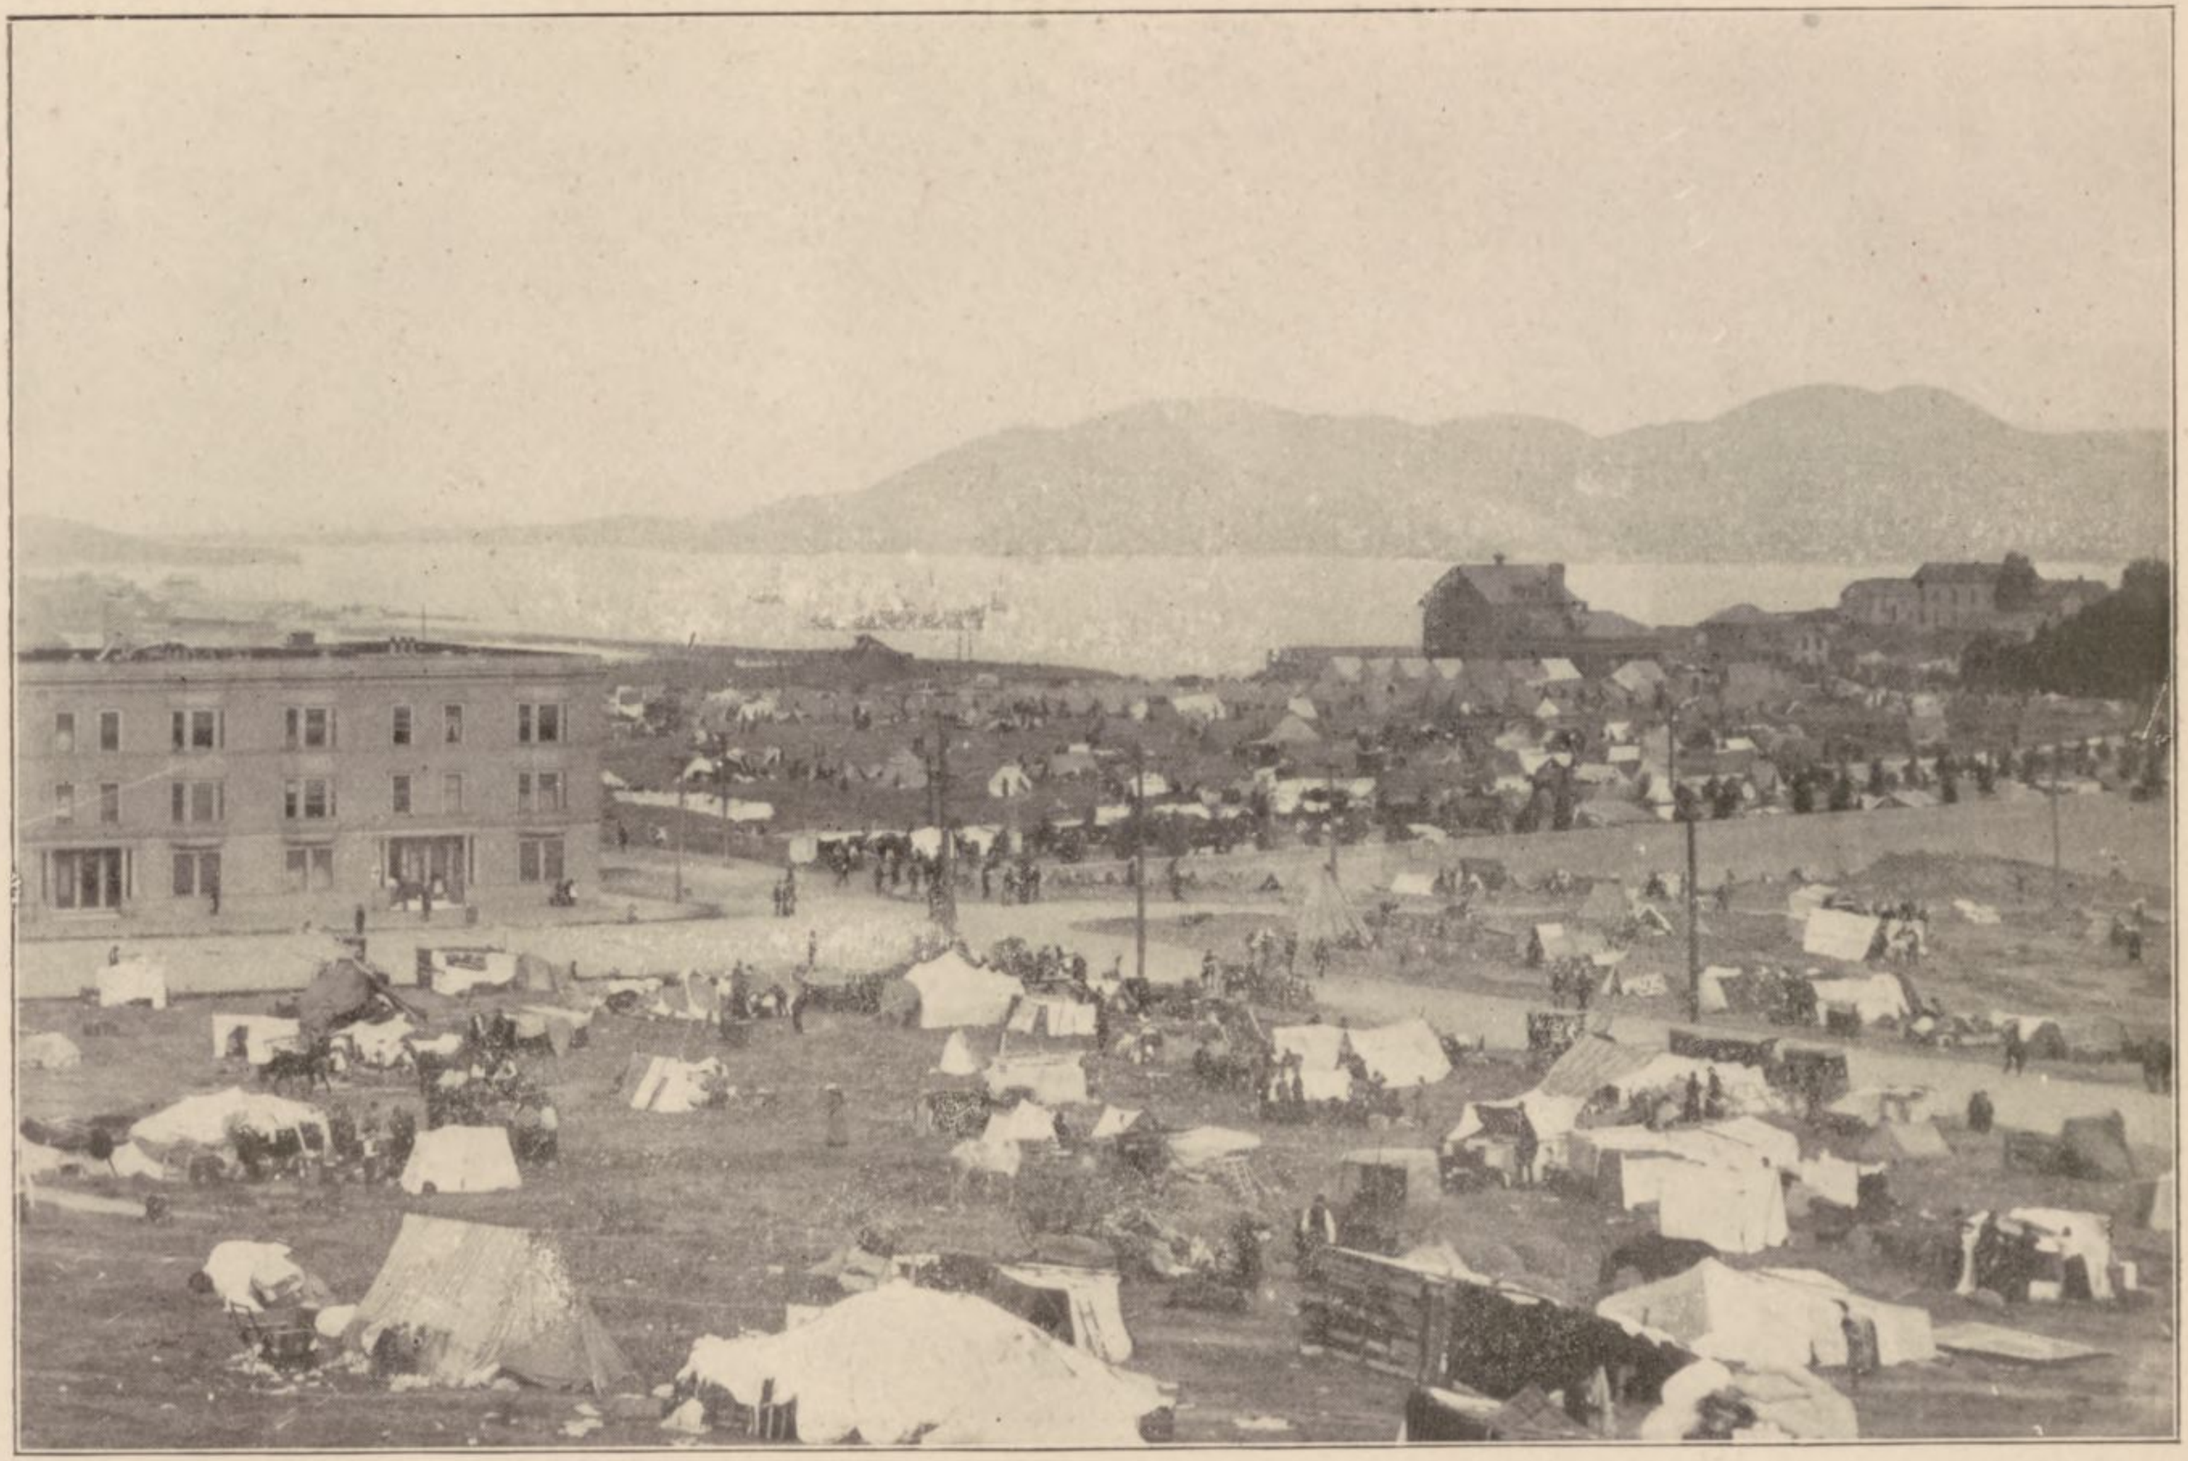
LABOR STATUE, SAN FRANCISCO, FIRST, BUSH, JAMISON AND MARKET STREETS.—This statue was erected through the provision made in the will of McDonough, a noted labor leader of San Francisco. The first earthquake recorded in California occurred Oct. 11, 1800, followed in 1803 by a second shock and again in 1806 by a third one; 1818, 1830 and 1857 each witnessed heavy seismic disturbances but the most severe quake up to that time occurred in 1868 around San Francisco Bay. The next notable one took place in 1871 but no serious disturbance followed until the one which shocked the entire civilized world, Wednesday morning April 18th, 1906.

A VIEW AT EIGHTEENTH AND VALENCIA STREETS, SAN FRANCISCO.—Showing the great fissures in the streets, cracking in the pavements and ruining the water, sewer and gas mains. The building on the left corner is a three story structure that has sunk a full story below the surface of the ground. In many places the asphalt was thrown up in enormous sheets, cables on street car lines were twisted and broken and all traffic was suspended.

VIEW OF THE FAMOUS McDONOUGH OR LABOR STATUE, SAN FRANCISCO, AFTER THE FIRE.—Located on First, Bush, Jamison and Market streets. San Francisco, like Rome, was built on a series of hills. The greater part of the town faced on beautiful San Francisco Bay, a splendid body of water overhung with a haze of magnificent coloring. Mount Tamalpais, 5,000 feet high, towers to the north and across the bay. San Francisco is nearer the mountains and forests than any other American city. In this part of California there is no thunder and lightning, and practically no snow.

CLAY STREET, SAN FRANCISCO, AFTER THE CATASTROPHE.—Showing the ruins of the Pacific Mutual Building and the Italian Bank on the right. Many of the structures were twisted into inconceivable shapes, while others flattened down and still others were almost crushed to powder.

REFUGEES IN GOLDEN GATE PARK, SAN FRANCISCO.—The illustration shows a few of the thousands who camped in this beautiful park, receiving rations from the Commissary Department of the Relief Committee. Golden Gate Park is one of the finest pleasure grounds in the world. Beautified by artistic landscape gardening, filled with rare tropical plants of gaudy foliage, bright with luxuriant velvety green lawns, it is a spot that attracts all visitors. It borders on one of the finest bathing beaches on the coast. Here children sport at their pleasure. Not far from this favored spot is the famous Cliff House, the Suttro Baths and the equally noted Seal Rocks where hundreds of seals may be seen basking on the rocks in the warm California sun.



A TEMPORARY CAMP OF REFUGEES, SAN FRANCISCO.—Parks, Squares, Cemeteries or vacant lots served as temporary abiding places for the thousands of homeless refugees. Tents made of bed quilts, stoves of stone or brick and similiar expedients were resorted to for shelter and cooking purposes. Strangers quickly became neighbors, dividing their few possessions among each other with a generous prodigality.

VIEW TAKEN FROM REAR OF ST. FRANCIS HOTEL, GEARY STREET, UNION SQUARE, SAN FRANCISCO.—In the heart of the city between Post and Geary streets After the fire. Showing refugees and their luggage camped around the Dewey monument. Here the fleeing citizens supposed they were safe from the raging flames, but the square only being a block in area, they were forced to vacate as the fire approached. The famous Shreve Building shown to the left of the monument, which was dedicated by President Roosevelt a year ago.

GENERAL VIEW OVERLOOKING, SAN FRANCISCO BAY.—Market Street Ferry Tower can be seen in the right background, the piers and slips in the center background- Looking down upon a wilderness of gaunt brick walls, a tangle of ruined homes, all that is left of the once proud and prosperous Golden Gate City, the metropolis of the Pacific.

ORPHEUM THEATER BUILDING, SAN FRANCISCO.—On O'Farrell street, between Powell and Stockton. The best patronized of the western vaudeville houses. This theater has proved a veritable gold mine to its owners. Every hour of the day and night, every day in the week and every month of the year this house was packed; in fact it was almost impossible to secure a seat unless tickets were purchased in advance. The building is now a total wreck, but undoubtedly will speedily be rebuilt by its owners.

GENERAL VIEW OF FIRE, SAN FRANCISCO. — Refugees camped in Square. Reliable insurance inspectors who have examined the field of ruin and devastation, now claim that a greater part of the city could have been saved, had it not been for the death of the veteran fire chief early the day of the awful catastrophe. The department was left without a head at the very crisis of its career. A number of new fires were started through the use of the dynamite employed in blowing up the many structures in the path of flames.

O'FARRELL STREET, SAN FRANCISCO.—Looking down from Stockton and Market streets, showing the seventeen-story Call Building in the center. Over 140,000 earthquakes have been recorded throughout the world but scientists have been so far unable to anticipate even approximately the approach of these phenomena which convulse the earth's surface; 417 quakes have been experienced in the last 960 months in San Francisco, but only 200 of them have been of sufficient intensity to be recorded at the Lick Observatory. Throughout the state as a whole, 956 shocks have been observed at 214 stations scattered in various parts of California.

THE EMPORIUM, MARKET STREET, BETWEEN FOURTH AND FIFTH STREETS, SAN FRANCISCO.—The largest and handsomest department store in the west. Located in the Parrot Building which was a total wreck; loss is estimated at over a million dollars. Other department stores that were destroyed or damaged are Hale & Frager's, the White House, O'Connor & Moffatt's, Newman & Levinson, Roos Bros., Raphael's, the Hub, the Davis, the City of Paris, Samuels', Vel Strauss, Wallace's, Nathan Dohrman & Co., and Bullock & Jones. The Shreve Jewelry Company, which was also damaged, carried a stock worth $2,000,000.

EAST VIEW FROM EIGHTH AND MARKET STREETS, SAN FRANCISCO.—The bay upon which the city is situated includes the smaller bays of San Pablo and Suisun. Within the bay are Alcatraz Island, upon which is situated a fortified garrison and military prison; also Angel Island, and a military reserve. The Presidio, Fort Point, Fort Mason, and the navy yard at Mare Island are other military posts in the vicinity.

O'FARRELL STREET, BETWEEN POWELL AND STOCKTON, SAN FRANCISCO.—Showing Fischer's Theater, at one time the largest and best patronized theater in the city. At the time of the fire it was used as a vaudeville. Other theaters destroyed were the Bush Street Theater, near Montgomery; the Grand Opera House, where the Conried Grand Opera Company had just opened; the Orpheum, the Columbia, the Alcazar, the Majestic, and the Central.

VIEW OF RUINS, CORNER FIFTH AND MARKET STREETS.—The heart of the business district near where the first fires started. San Francisco has the largest mint in the world, 11 savings banks, 33 commercial and 7 national banks with bank clearings of over $2,000,000,000; imports of over $50,000,000; exports $60,000,000; assessment roll, $600,000,000. Ranked first in the world in the use of telephones, having one for every 16 inhabitants.

MARKET STREET FERRY, SAN FRANCISCO.—Cost $1,000,000. The gateway of escape for hundreds of thousands of refugees on their way out of the doomed city. The clock in the tower, stopped with the hands pointing to 5.13 A.M. the moment of the first shock. All traction lines of the city center here. One of the busiest places on the coast. Built of structural iron faced with sand stone. The tower is 230 feet high. The refugees in their flight brought many a strange burden. One man wheeled a barrow with one shoe in it. Others carried canary birds and empty cages and one dragged a lawn mower after him over the bricks and stones and debris.

RUINS OF EMANU-EL SYNAGOGUE. SUTTER STREET, NEAR POWELL, SAN FRANCISCO.—The city had about thirty-five important churches besides many missions. representing all denominations and many nationalities. The Mission Dolores being the first; dedicated Oct. 8, 1776. In 1904 property on the southeast side of Market street sold for $6,000 a front foot.

NORTHEAST VIEW FROM STOCKTON STREET, SAN FRANCISCO. — Union Square Park, showing Dewey statue in center. The streets and parks witnessed many a tragedy of despair. One old grizzled man, whose beard swept his breast, stood in the middle of the desolated street with arms extended, chanting like some prophet of old: "Desolation! desolation!" Then this modern Jeremiah turned and chanted the sonorous psalm of David: "I Will Lift Up Mine Eyes to the Hill Whence Cometh My Help."

HIBERNIAN BANK BUILDING, JUNCTION OF McALLISTER, JONES AND MARKET STREETS, SAN FRANCISCO.—Burned and ruined but with its vaults intact. Among other banks that were wrecked are the Nevada National, California National, First National, First Canadian Bank of Commerce, London, Paris and American Bank, Bank of British North America, German-American Savings and the Italian American Bank. Probably not a penny in the pockets of the thousands of citizens—laborers and millionaires—but approximately over fifty million dollars lay buried in the vaults beneath scorching ruins and debris—all that was left of the famous financial institutions of the Golden Gate City.

A FIELD OF DEBRIS, SAN FRANCISCO,—Foreground showing McAllister and Larkin Street, a type of the ruin that has fallen upon the prosperous city. City Hall Dome shown to the left. As reports continue to come in from refugees who are in a position to know, the loss is far in excess of the early estimates, both in property and life. Official estimates have confined the dead to 1,000

MARKET AND FRONT STREETS, SAN FRANCISCO, CALIFORNIA.—The downtown district has practically been wiped off of the map. In many localities every thing seems to have been fused and melted in a whirlwind of fire while in other places only one or two stories of the buildings have been burned. In one instance the fire was seen to jump an entire block without damage to intervening structures.

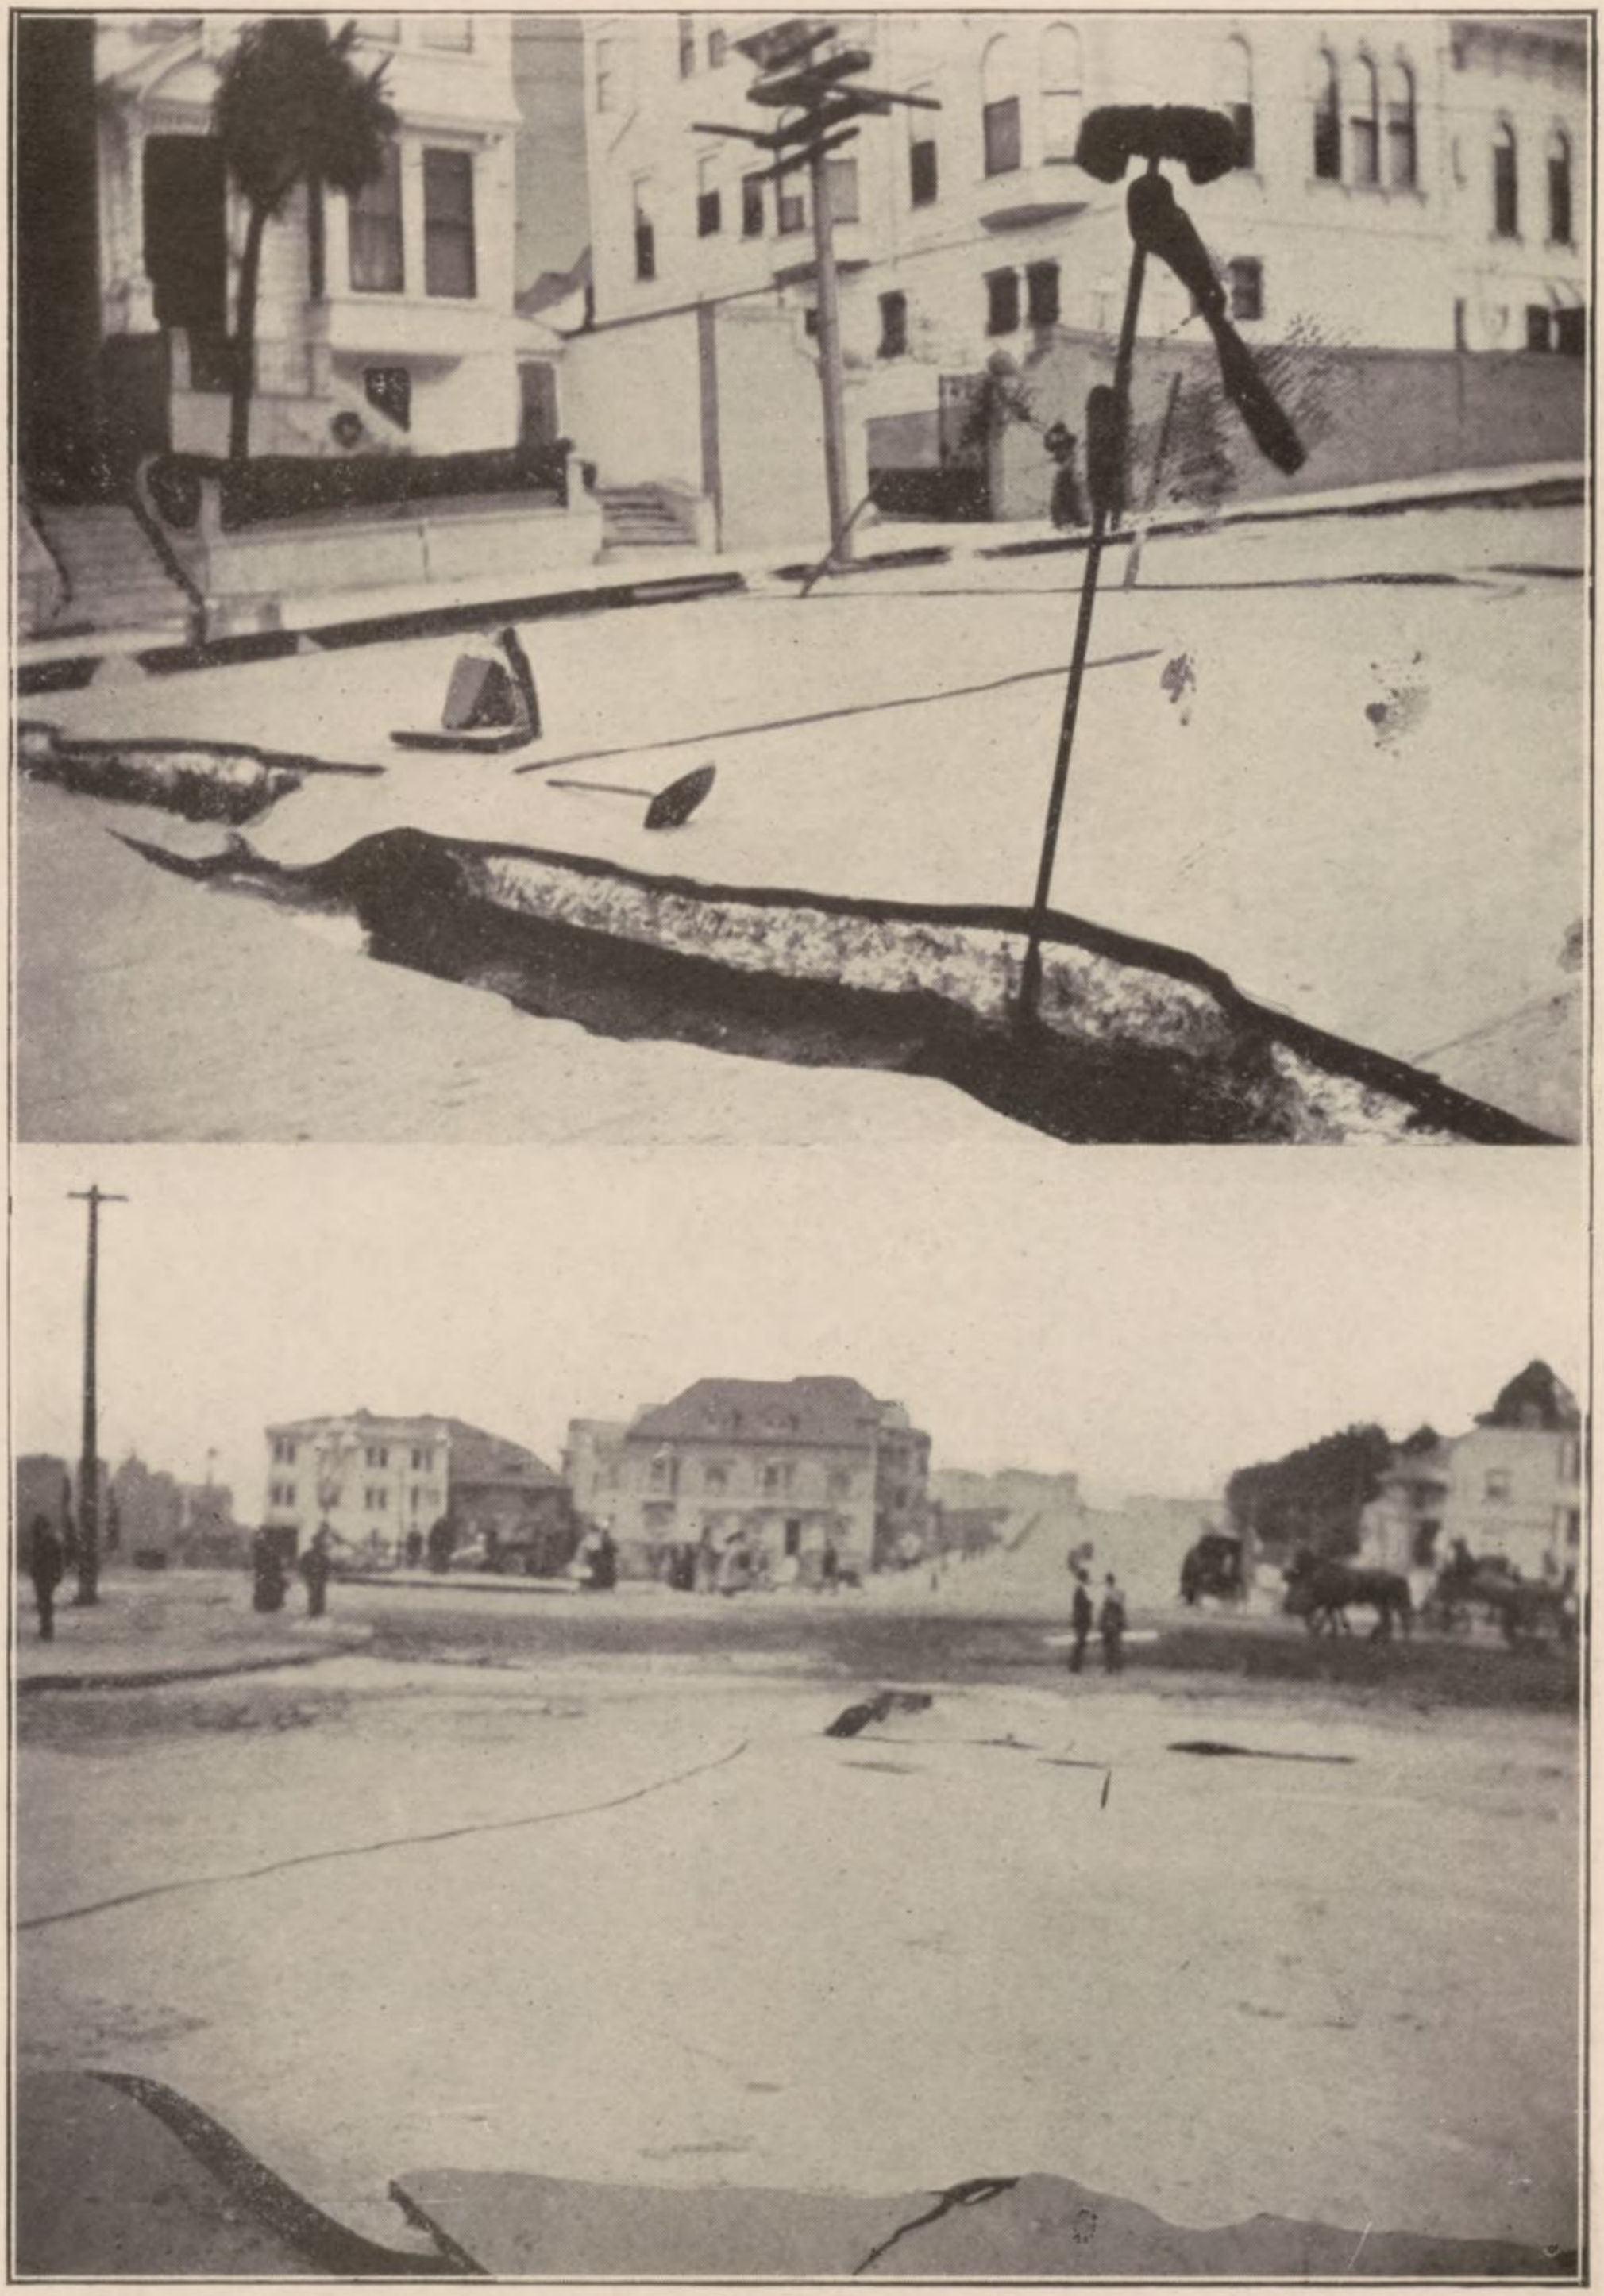
唐人印字館

CHINESE PRINTING SHOP, SAN FRANCISCO.—Sacramento near Kearney Street Ng Poon Chew proprietor. This shop has over five thousand different characters in its cases. One of the very few Chinese printing establishments in the United States. Mr. Ng Poon Chew is a highly educated native of China who has lectured at Chicago and other Universities.

EAST VIEW ON MARKET AND THIRD STREETS, LOOKING TOWARD THE FERRY, SAN FRANCISCO.
San Francisco was the largest city on the Pacific Coast. A Spanish post was established here in 1776. The town was laid out in 1835 A United States man-of-war took possession of it 1846 and in 1849 it became quite an important place. It was burnt in 1849 and also in 1851. Incorporated 1850. Steamers connect with Japan, Australia, Central America and China and the recent development of the "Far East" was rapidly being felt in the increased commerce of the Golden Gate City.

McDONOUGH THEATER, OAKLAND, CALIF.— Broadway, Pennsylvania and San Pueblo Avenue. The property loss in Oakland was comparatively small. Had the city met with the same fate that befell San Francisco the hundreds of thousands of refugees probably would not have escaped so easily from the doomed city. It was indeed fortunate that Oakland, Sacramento and Los Angeles were in a position to respond so quickly and so liberally.

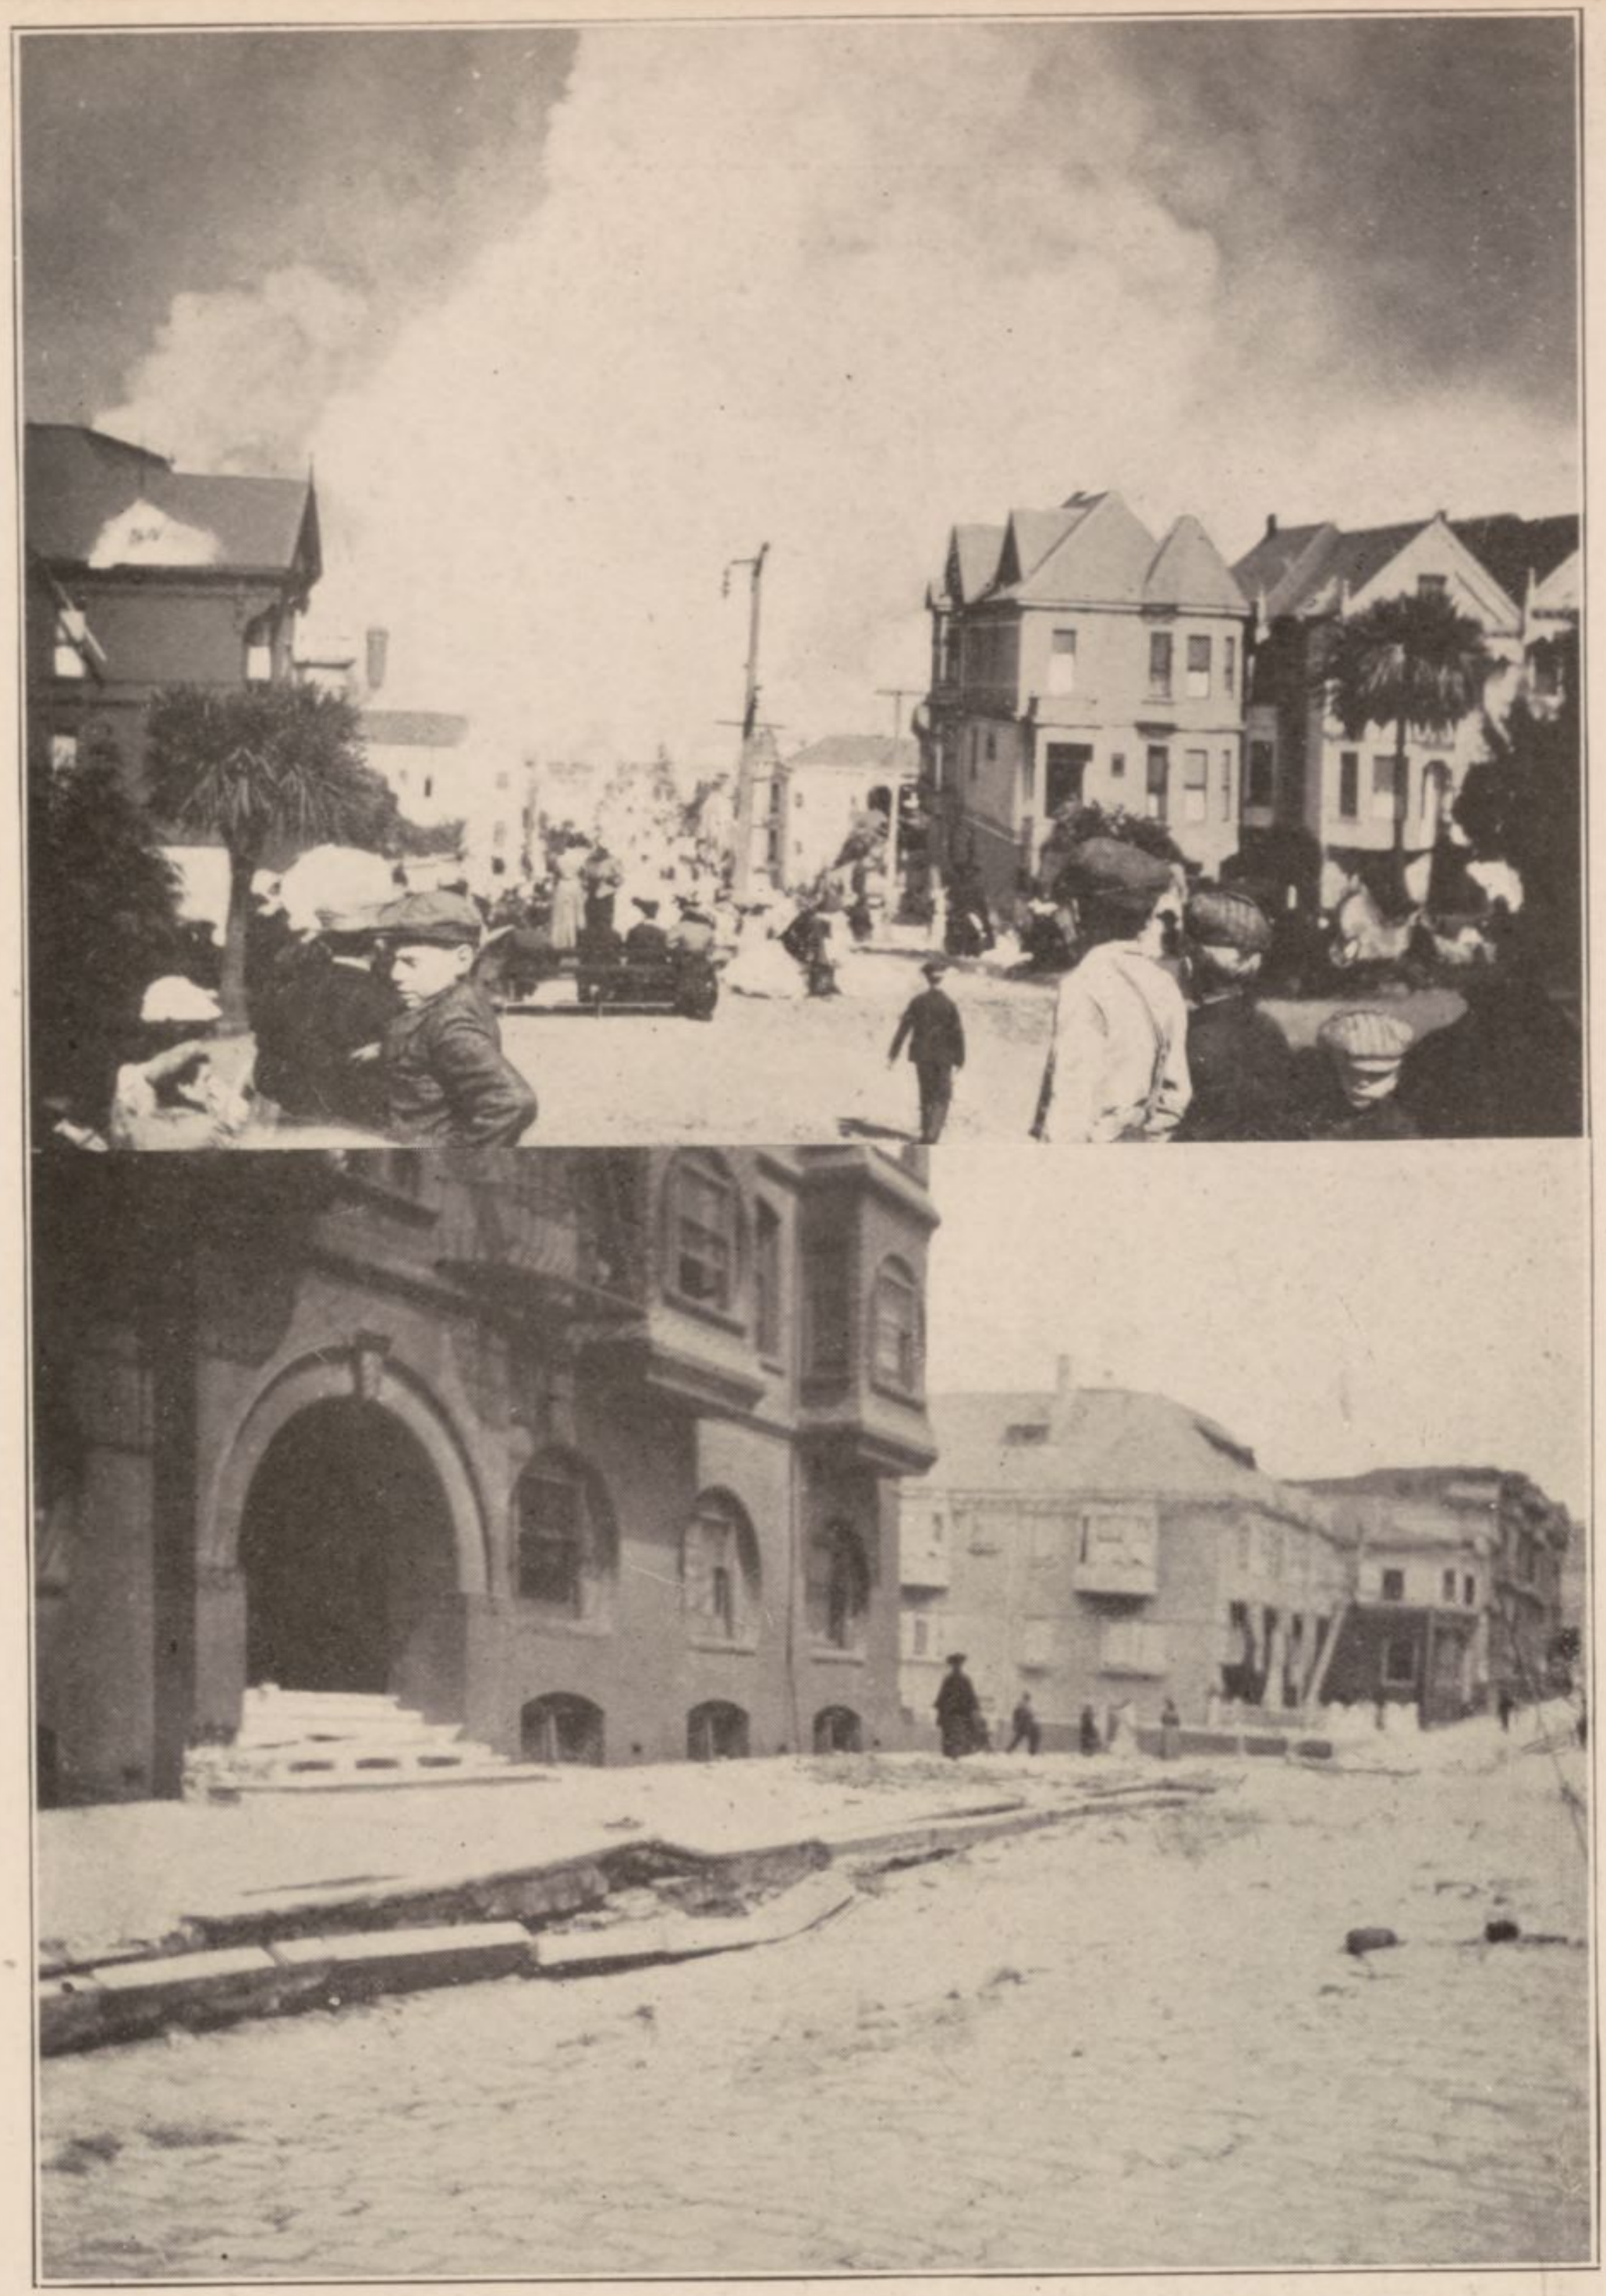
RUINS OF THE FAIRMOUNT HOTEL — Erected by Mrs. Oelrich, but recently purchased by Law Brothers, the intention being to make it the most famous hotel in the world. Located on Nob Hill, overlooking the beautiful Bay and surrounding country for miles. Cost about $3,000,000. Capacity fifteen hundred rooms, with every modern convenience.



FISSURES. VAN NESS AVE, RESIDENCE DISTRICT, NORTH OF MARKET STREET, SAN FRANCISCO.—In many places the ground opened and fire spouted in flames from the broken gas pipes. Seismic phenomena are mentioned by early historians—Thucydides, Aristotle, and Pliny, but it has only been within recent years that earthquakes have been studied as a science.

VIEW OF FIRST BAPTIST CHURCH, EDDY, NEAR JONES STREET. FIRE ENGINES READY FOR WORK, ELLIS AND JONES STS., SAN FRANCISCO.— The picture shows a building on the corner which has sunk below the surface owing to the depression of the crust caused by the earthquake.

METHODIST CHURCH, OAKLAND, CALIF. — A beautiful edifice on San Pueblo avenue, totally ruined by the earthquake.

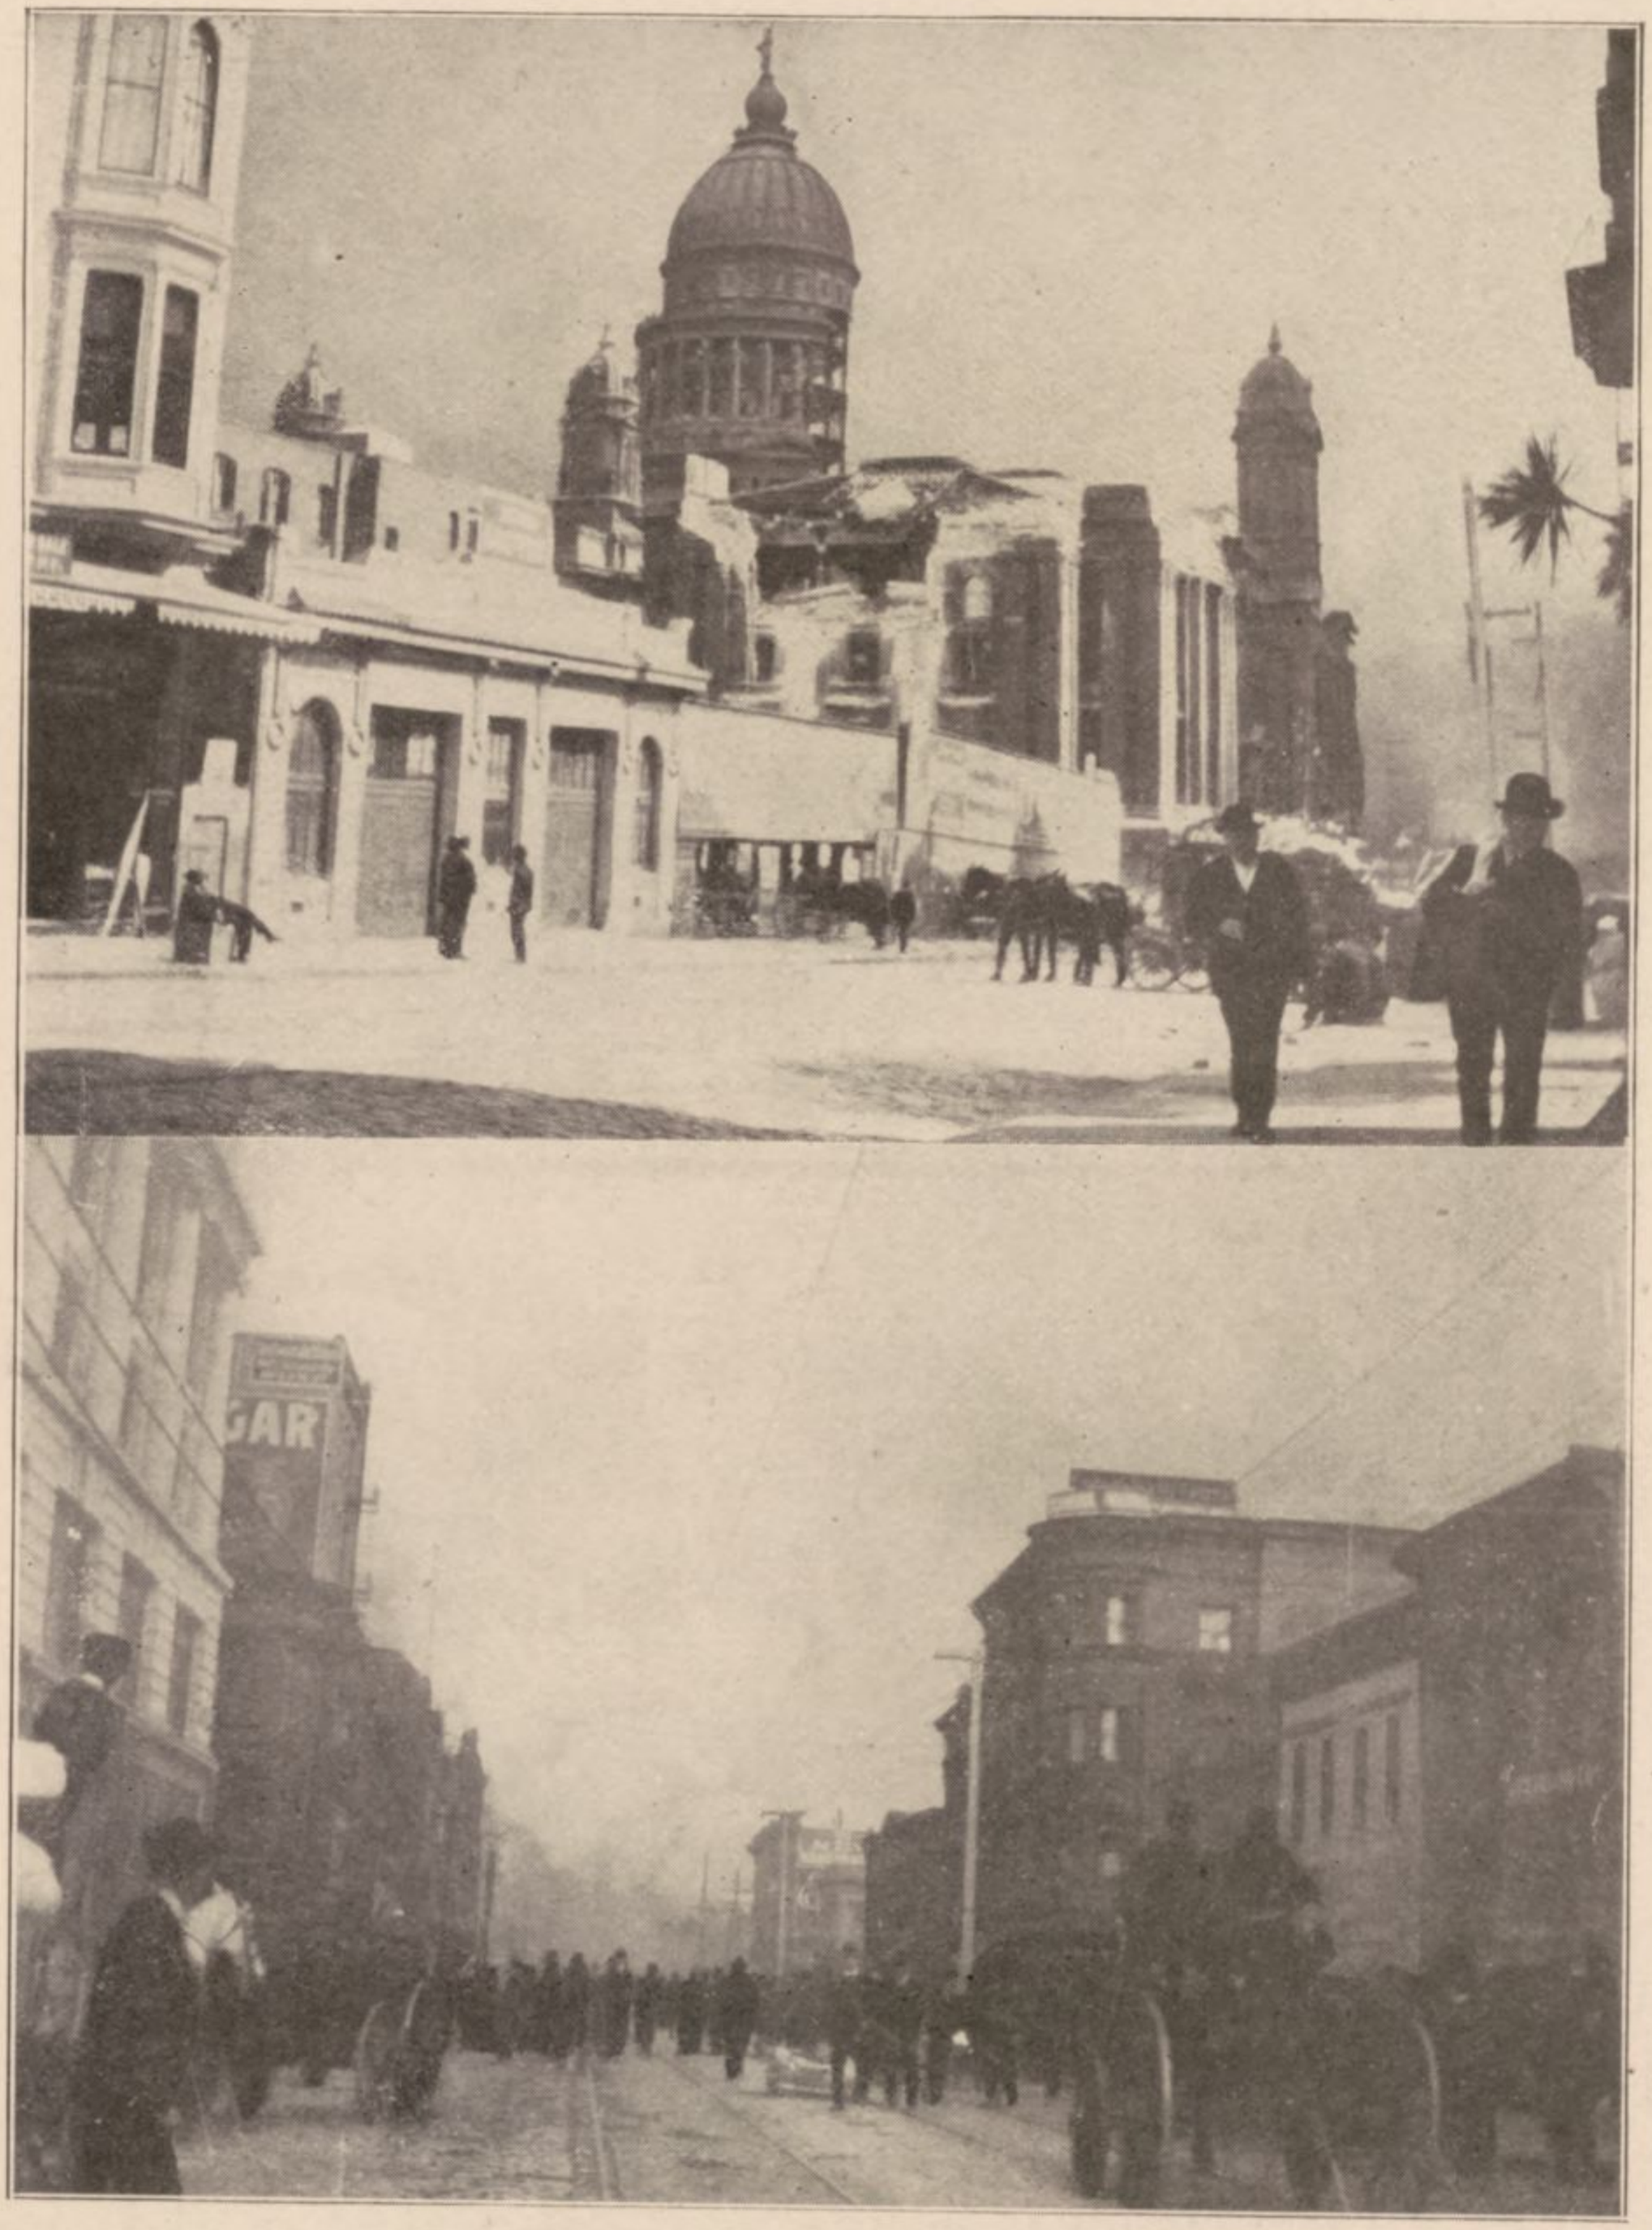


CORNER HYDE AND GOLDEN GATE AVENUE, SAN FRANCISCO. — Lower picture was taken by one of the refugees who with his wife was sleeping in one of the houses at time of the earthquake. The building sunk below the surface, plaster fell and partitions crashed giving the inmates only time to reach the street and escape to a place of safety.

CHINATOWN, SAN FRANCISCO.—Before the great calamity no foreign quarter in America attracted so much attention as San Francisco's Chinatown, containing a population of about 25,000 Chinese. The ground under their residences was fairly honey-combed with cellars and secret passages. The quarter has been totally destroyed and it is the intention of the city to remove the Chinese to a new location when the city is rebuilt.

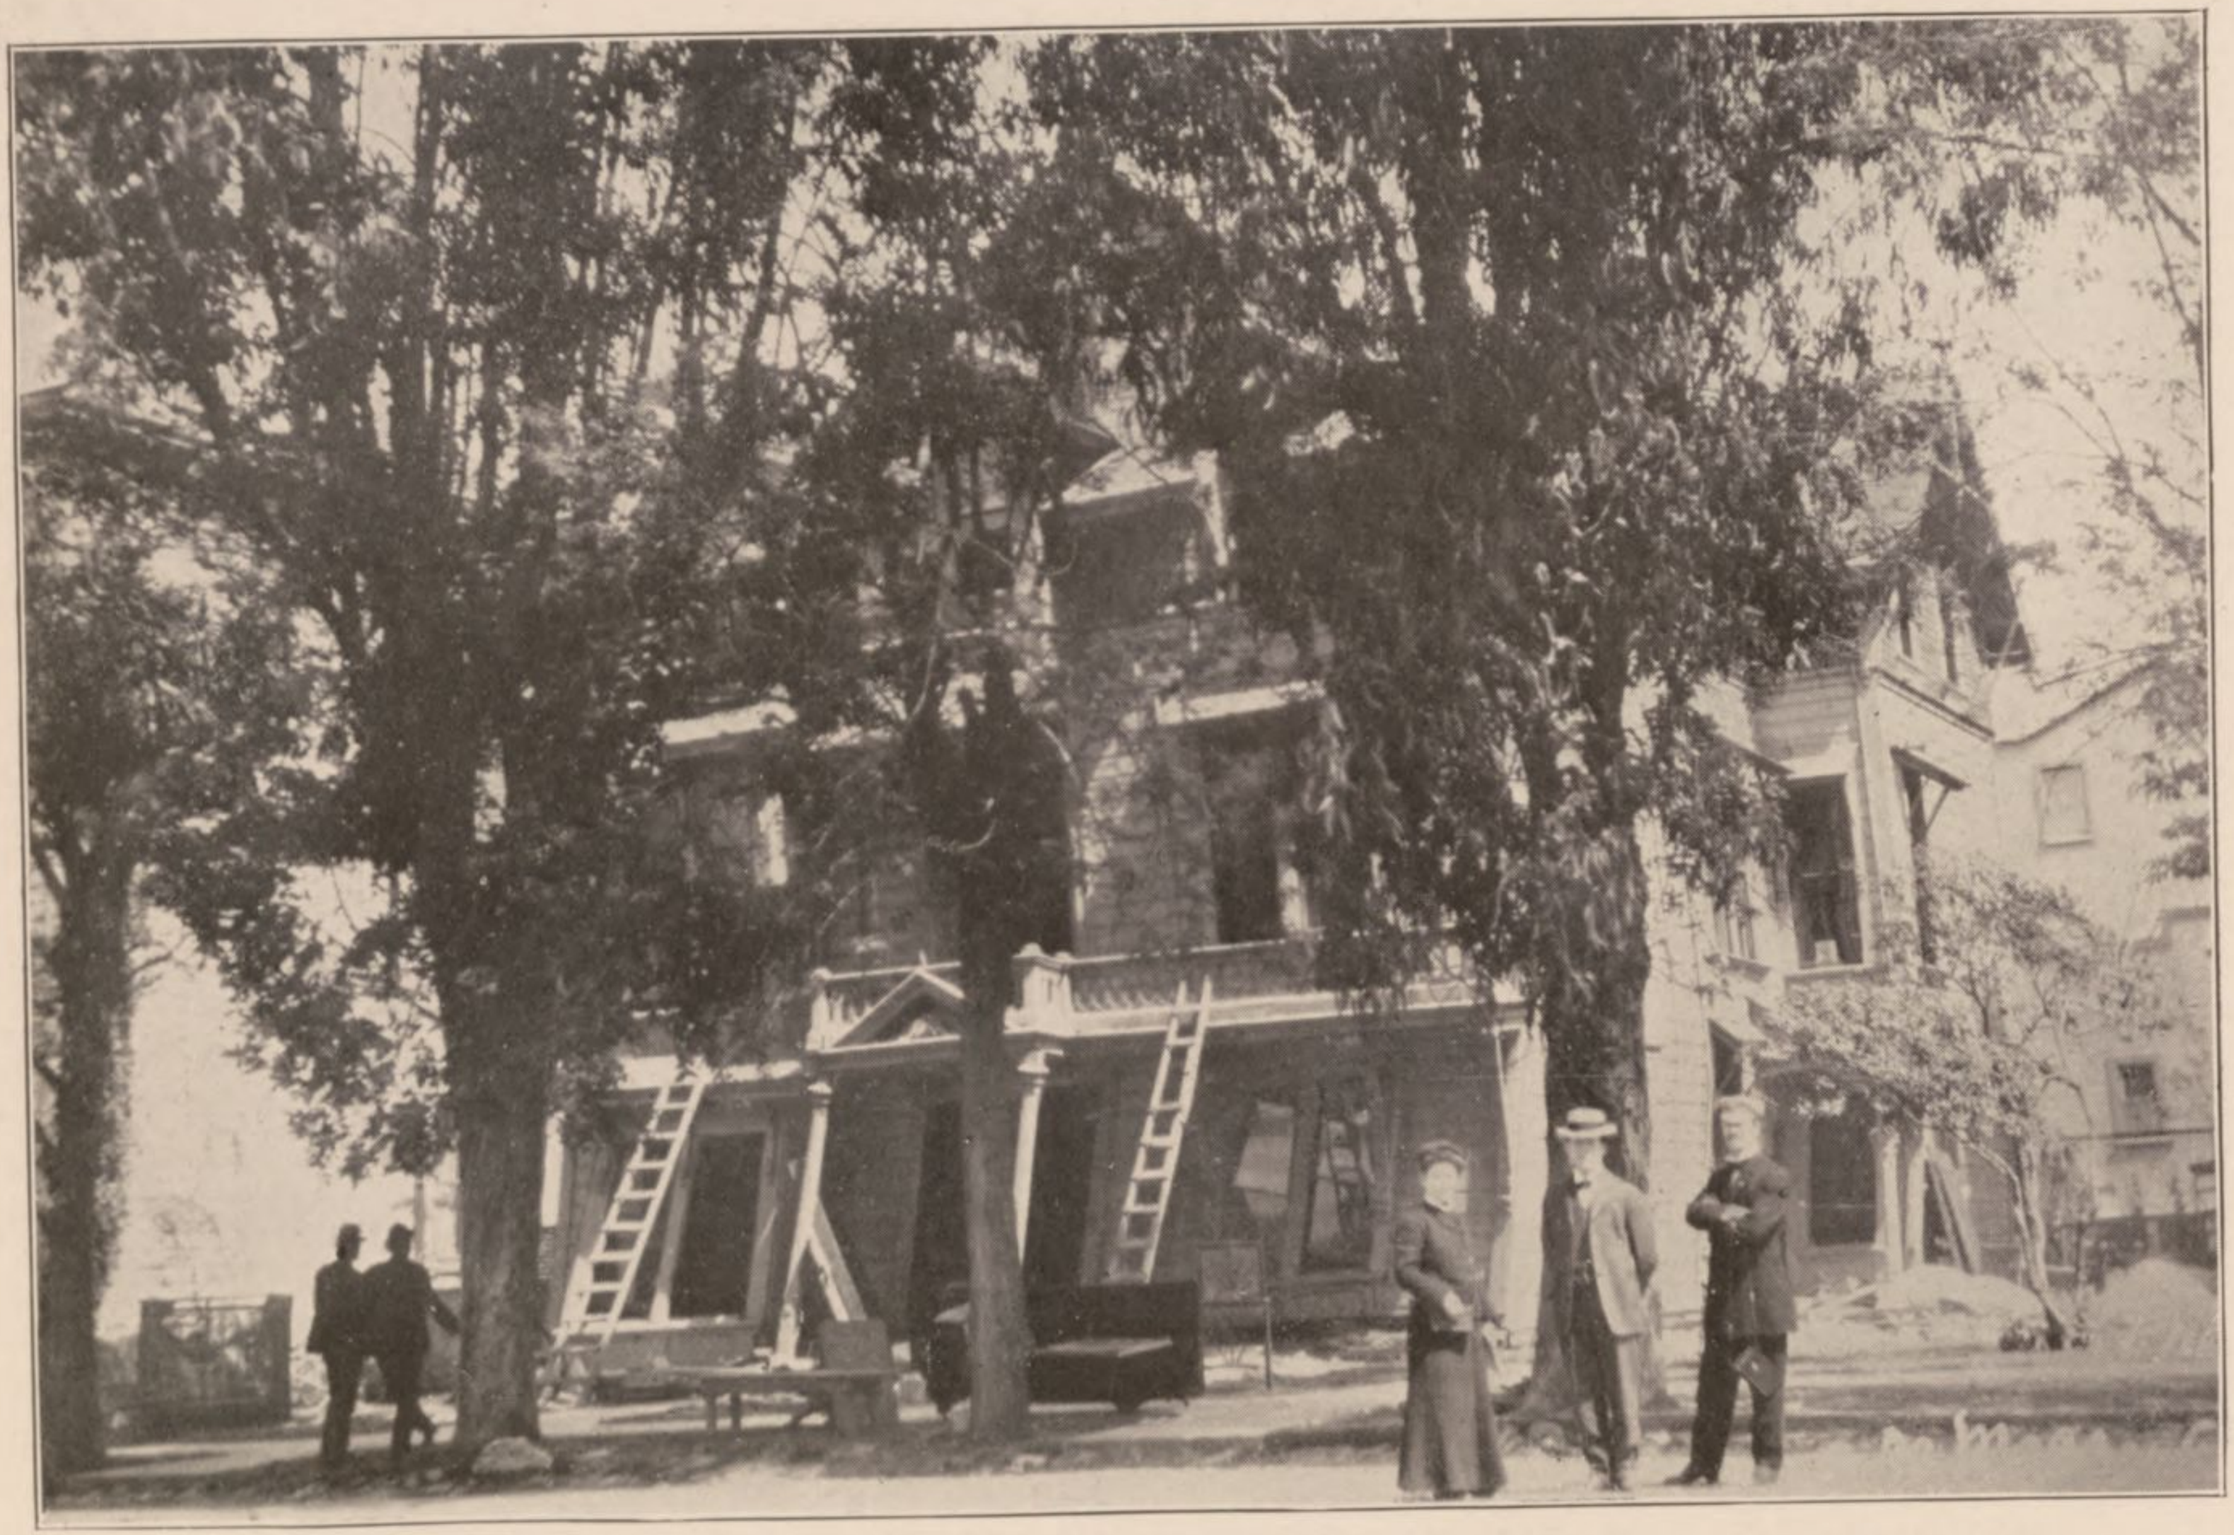
CLIFF HOUSE SAN FRANCISCO.—This famous hotel attracts sight-seers from all parts of the globe. Hundreds of seals constantly swarm over the rocks in the bay, basking in the sun and swimming in the surf. Sutra bath-house, the largest and most unique in the world, is within a stones throw of the Cliff House. The salt water continualty flows in and out from the sea and is brought to proper temperature by artificial means.

the sea and is brought to proper temperature by artificial means.



COURT HOUSE AND SMOKE FROM MECHANIC'S PAVILION, SAN FRANCISCO.— Some two hundred wounded and dying refugees were within its walls. Escape

WHERE THE FIRE STARTED, FIFTH STREET, SAN FRANCISCO.—Taken from Market Street, six o'clock of the morning of the earthquake, This is probably the first picture taken in the doomed city on the day of the awful disaster.



A RUINED RESIDENCE IN CHESTNUT STREET, OAKLAND, CALIF. — By a peculiar freak of the earthquake, this house was practically split in two horizontally. Oakland is a beautiful city of about 90 000 population, situated across the bay from San Francisco. For days a continuous stream of refugees poured into this hospitable city where they found a warm and practical welcome.

ALAMEDA COUNTY COURT-HOUSE GROUNDS, OAKLAND, CALIF. — Located on Pennsylvania, San Pueblo avenues and Broadway. Hundreds of refugees from San Francisco found a temporary resting-place in these beautiful grounds. The climate of Oakland is famous the world over. Separated from the ocean by San Francisco Bay and the peninsula upon which San Francisco is located, the air is mild and balmy. In fact there is quite a noticeable contrast in climate between the two sister cities.

OAKLAND SAVINGS BANK, OAKLAND, CALIF.—Twelfth street and Broadway. Picture shows the lower story propped up. An entire new foundation will have to be built in order to support the upper stories, which are practically undamaged. The earthquake was recorded on all the government seismographs, the impulse being so strong that the needle-like point moved entirely off of the t.acing paper. Even at Moscow, Russia, a slight shock was felt, sufficient at least to be recorded on the seismograph at Moscow.

REFUGEES, ALAMEDA COUNTY COURT-HOUSE PARK, OAKLAND, CALIF.—Waiting for a pass to San Francisco to hunt for lost friends and relatives. So great was the anxiety to get into the burned city, that it was necessary to restrict everyone but those whose duty compelled them to enter. Tents did splendidly as temporary residences, although thousands had nothing to cover them from the heat of the sun or the moisture of the rain.

ALAMEDA COUNTY COURT-HOUSE PARK, OAKLAND, CALIF.—View from the court-house steps, showing drinktng fountain where thousands of the refugees quenched their thirst, and the stacked arms of the soldiers on guard. Thousands of people who do business in San Francisco have their homes in Oakland. It is the terminus from which overland passengers take the ferry to the Golden Gate City.

REFUGEES IN OAKLAND, ON THEIR WAY FROM THE FERRY. — "Thousands of persons, seemingly devoid of reason. crowded around the ferry station, in San Francisco," said one fortunate enough to escape. "At the iron gates they clawed with their hands as so many maniacs. They sought to break the bars. and failing in that, turned upon each other. When the gates were thrown open, the rush was tremendous. The people flowed through the passageways like a mountain torrent, that, meeting rocks in its path, dashes over them. Those that fell saved themselves as best they could."

TRAIN LANDING REFUGEES AT OAKLAND PIER FROM SAN FRANCISCO.—All during the horrible panic there was one magic word which brought hope to the hearts of thousands of weary refugees—a sesame that promised food, drink, shelter, clothing and water—and that mystic but potent word was Oakland. Here the weak and suffering, the homeless frantic multitude found rest and comfort—a hospitality that has made the name of Oakland famous.

NAPA HOTEL.—A room in this noted inn after the devastating crash had precipitated the little city of Napa into a reign of terror and death. April 18, 1906, at 5:15 A. M.. the crash of doom thundered down upon the beautiful village, famous the world over for its wineries and vineyards. One of the survivors, injured by falling walls, is shown in the picture.

RUINS HOBSON BUILDING, SAN JOSE, CALIF. — One killed and three injured in this wreck. From San Jose to Alviso the road is greatly depressed by the shock and at Alviso the principal hotel has sunk at least ten feet. San Jose is famous the world over for its wine and grape vineyards. Its beautiful scenery and climate attracts visitors from all parts of the world.

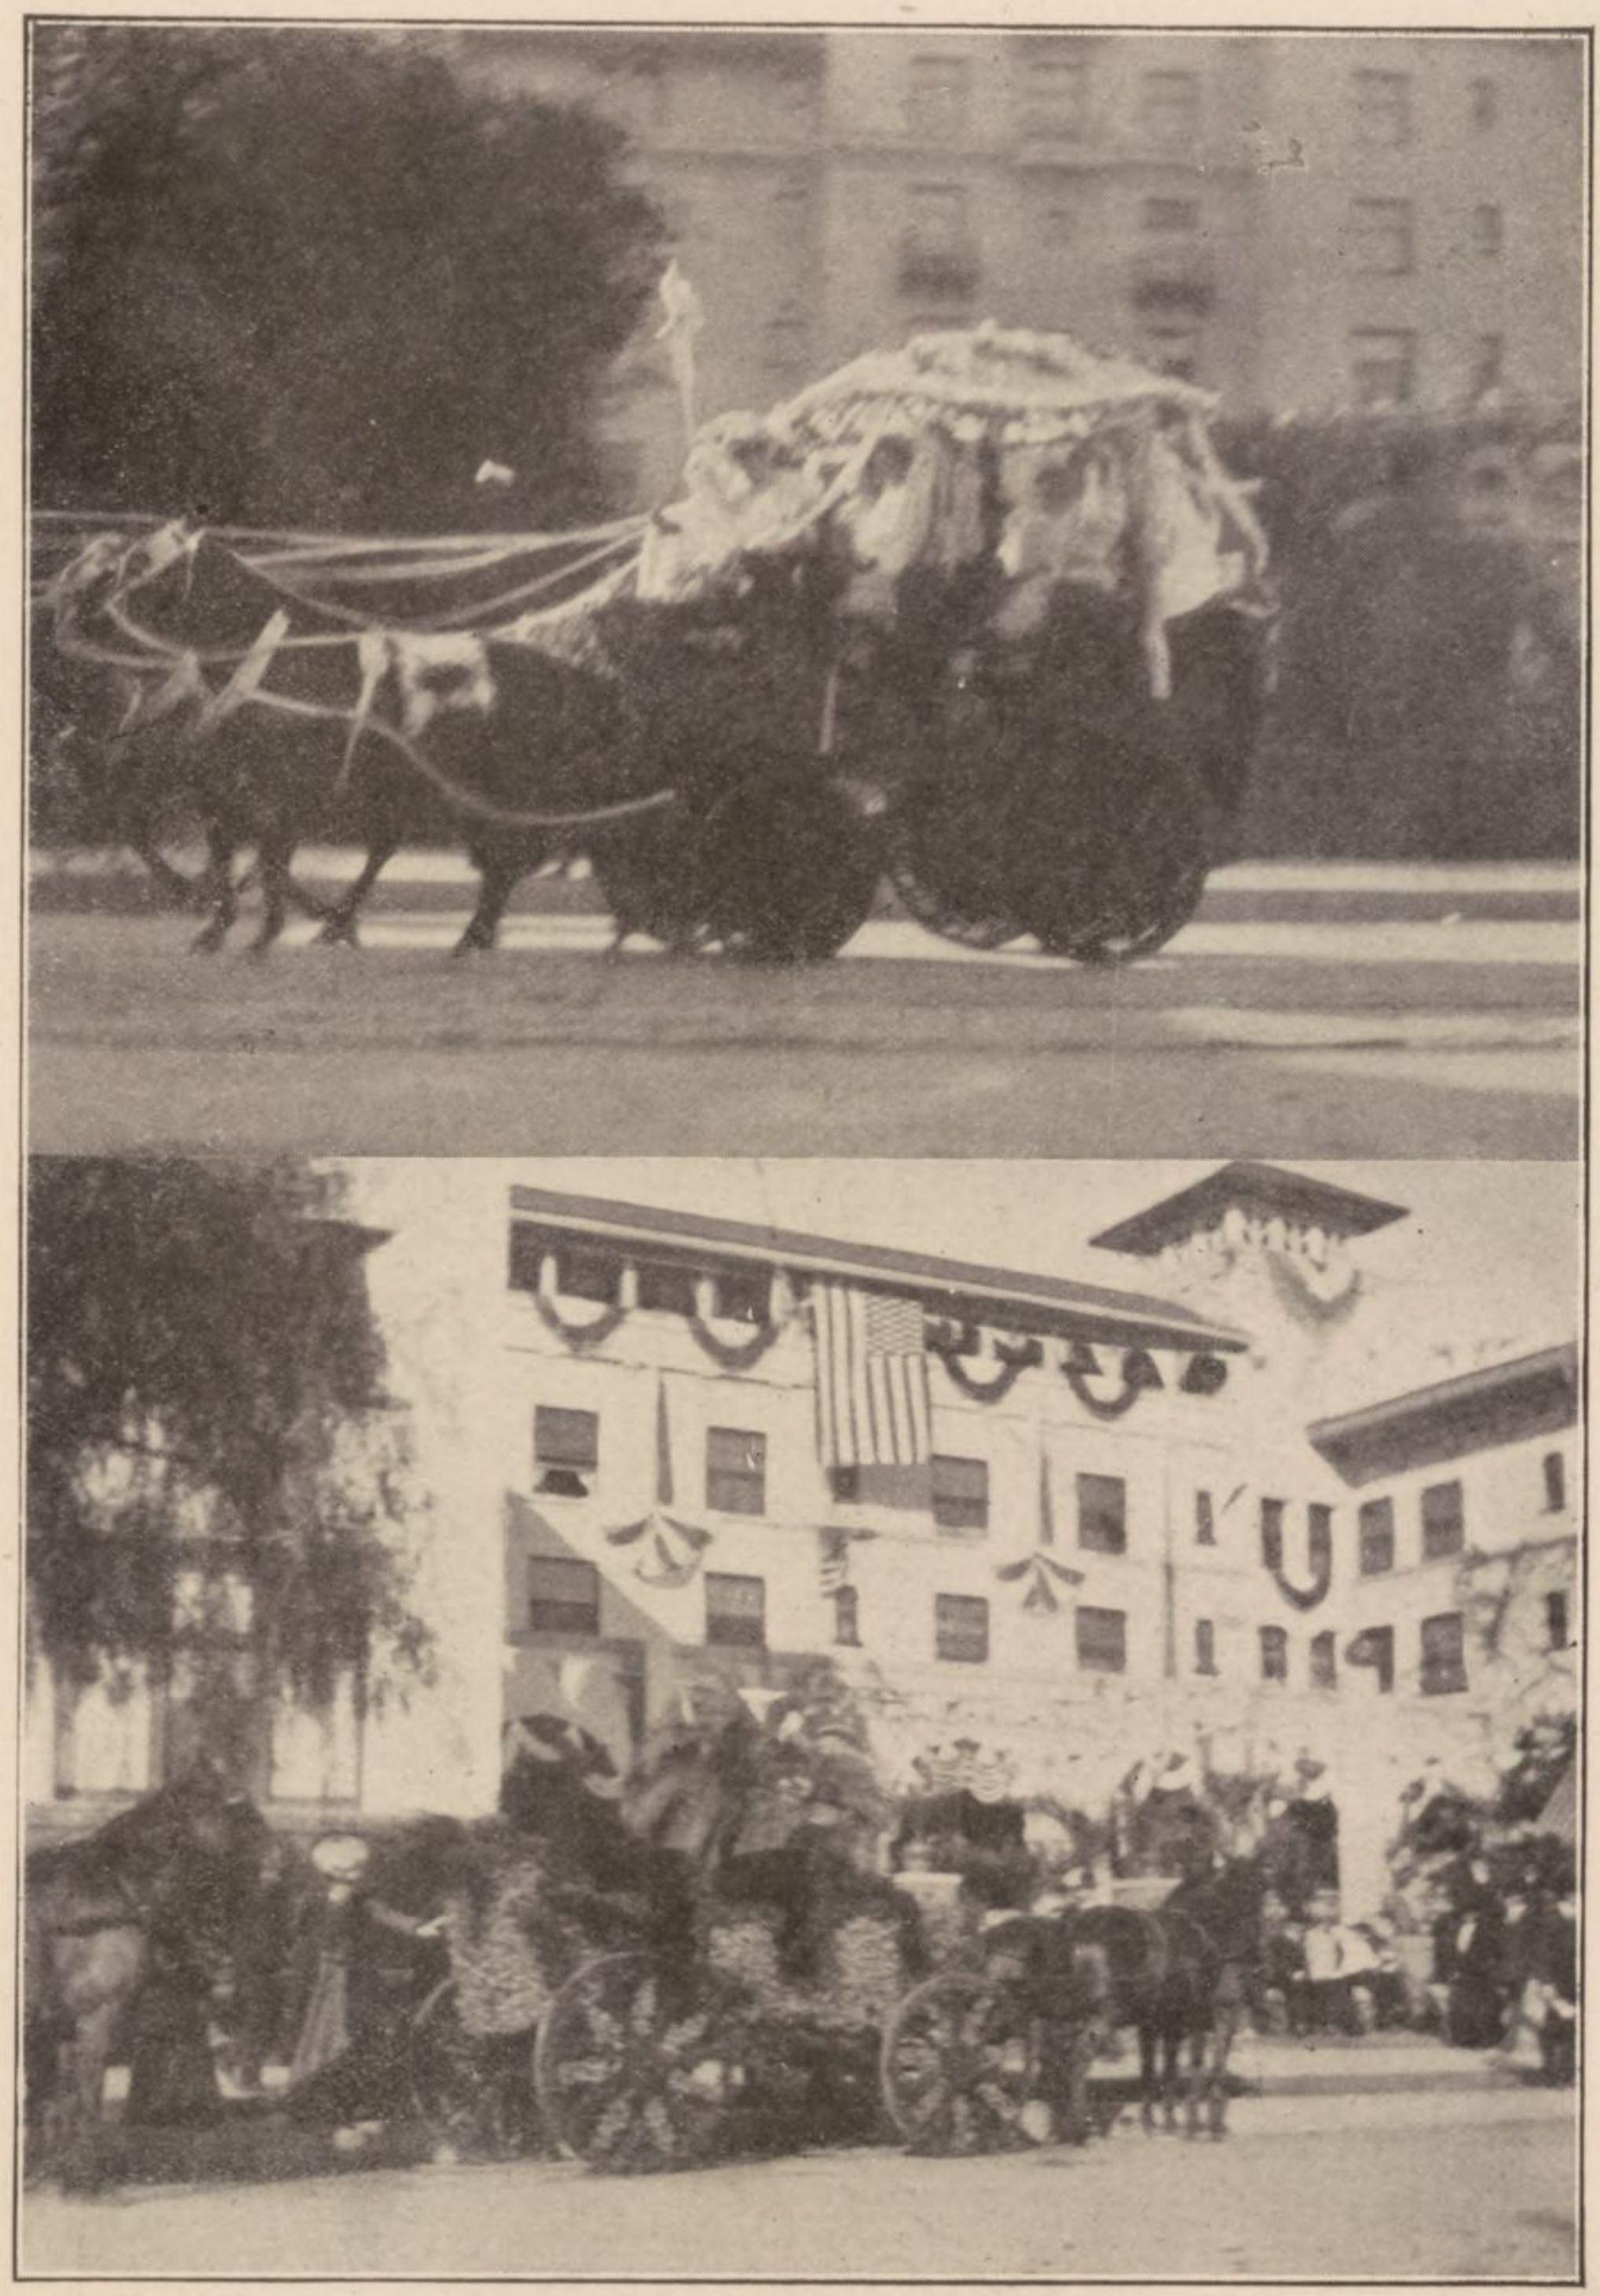
HOTEL VENDOME AND PARK, SAN JOSE, CALF.—This beautiful, thriving city, almost completely destroyed by the devastating earthquake, is the county seat of Santa Clara county, 48 miles south of San Francisco. The first California legislature met here in 1849-1850. Tourists are attracted to this garden spot from all parts of the world, starting from here to view the famous Lick observatory on Mt. Hamilton.

FISSURES, NEAR SALINAS, CALIFORNIA.—A gap in the earth three feet deep, running through a grain field. Sudden depressions, open fissures, and swamps of boiling mud are a few of the peculiar results of the earthquake in various parts of California.

RUINS OF A SIX STORY HOTEL, SANTA ROSA, CALIFORNIA.—In proportion to its size, this beautiful little city suffered more than any other town. The entire business portion was totally wrecked and nearly one hundred were killed. Bankers and millionaires were for the time being on a level with the commonest laborers.

47

REVERE HOTEL, NAPA, CALIFORNIA.—One of the popular hotels of Napa, located on First street. The inmates narrowly escaped a horrible death in the frightful catastrophe which ruined scores of beautiful homes and public buildings. Covered with plaster and broken glass, the guests fled through the corridors in their night-clothes, unmindful of their personal possessions. Along almost the entire front wall, five feet of masonry crashed into the street in a rain of powder, destroying the balcony but leaving the entire front otherwise intact.



VIEWS OF THE FLORAL PARADE, LOS ANGELES, CALIFORNIA.—The Floral Tournament is a feature celebrated in Los Angeles January first of every year. After the parade races of all kinds and various sports are indulged in. A picturesque and interesting sight.

89

JAMES J. JEFFRIES, WORLD'S CHAMPION HEAVYWEIGHT PUGILIST, (In sweater.)— Selling oranges from a wagon in the streets of Los Angeles, for the benefit of the San Francisco earthquake victims. Many of his sales amounted to over ten dollars each for a single orange. Actresses sold kisses at fabulous prices and many personal sacrifices were made in behalf of the helpless victims.

ANGEL'S FLIGHT, LOS ANGELES, CALIF.—A well-known spot in the "City of the Angels." Showing the smallest inclined railroad in the world. At the top of the hill is a cafe and a tower from which a splendid view may be had of the beautiful city.

HOMELESS ORPHANS.—Victims of the San Francisco earthquake and fire being sheltered by tbe Volunteers of America at the Maude B. Booth Home, Los Angeles. Hundreds of little tots were separated from their parents and friends in the awful rush to escape from the doomed city. Many of them were doubtless killed while others were rescued from starvation and restored to their frantic parents.

WRECKED MEMORIAL LIBRARY, LELAND STANFORD JR. UNIVERSITY, SAN FRANCISCO.—The object of the university, in the words of its founder is "To produce leaders and educators in every branch of science and industry and to advance the arts and sciences." The inner quadrangle contained twelve buildings and four shops.

MEMORIAL CHURCH.—Completed last of 1902. Dedicated January 25, 1903. One of the handsomest churches in the United States, comparing favorably with the wonderful cathedrals of England. Decorated with Venetian mosaics and stained glass windows which have no equal in America. Rev. R. Weber Newton was installed as pastor by the university. The organ made in Los Angeles, has over 3000 tubes.

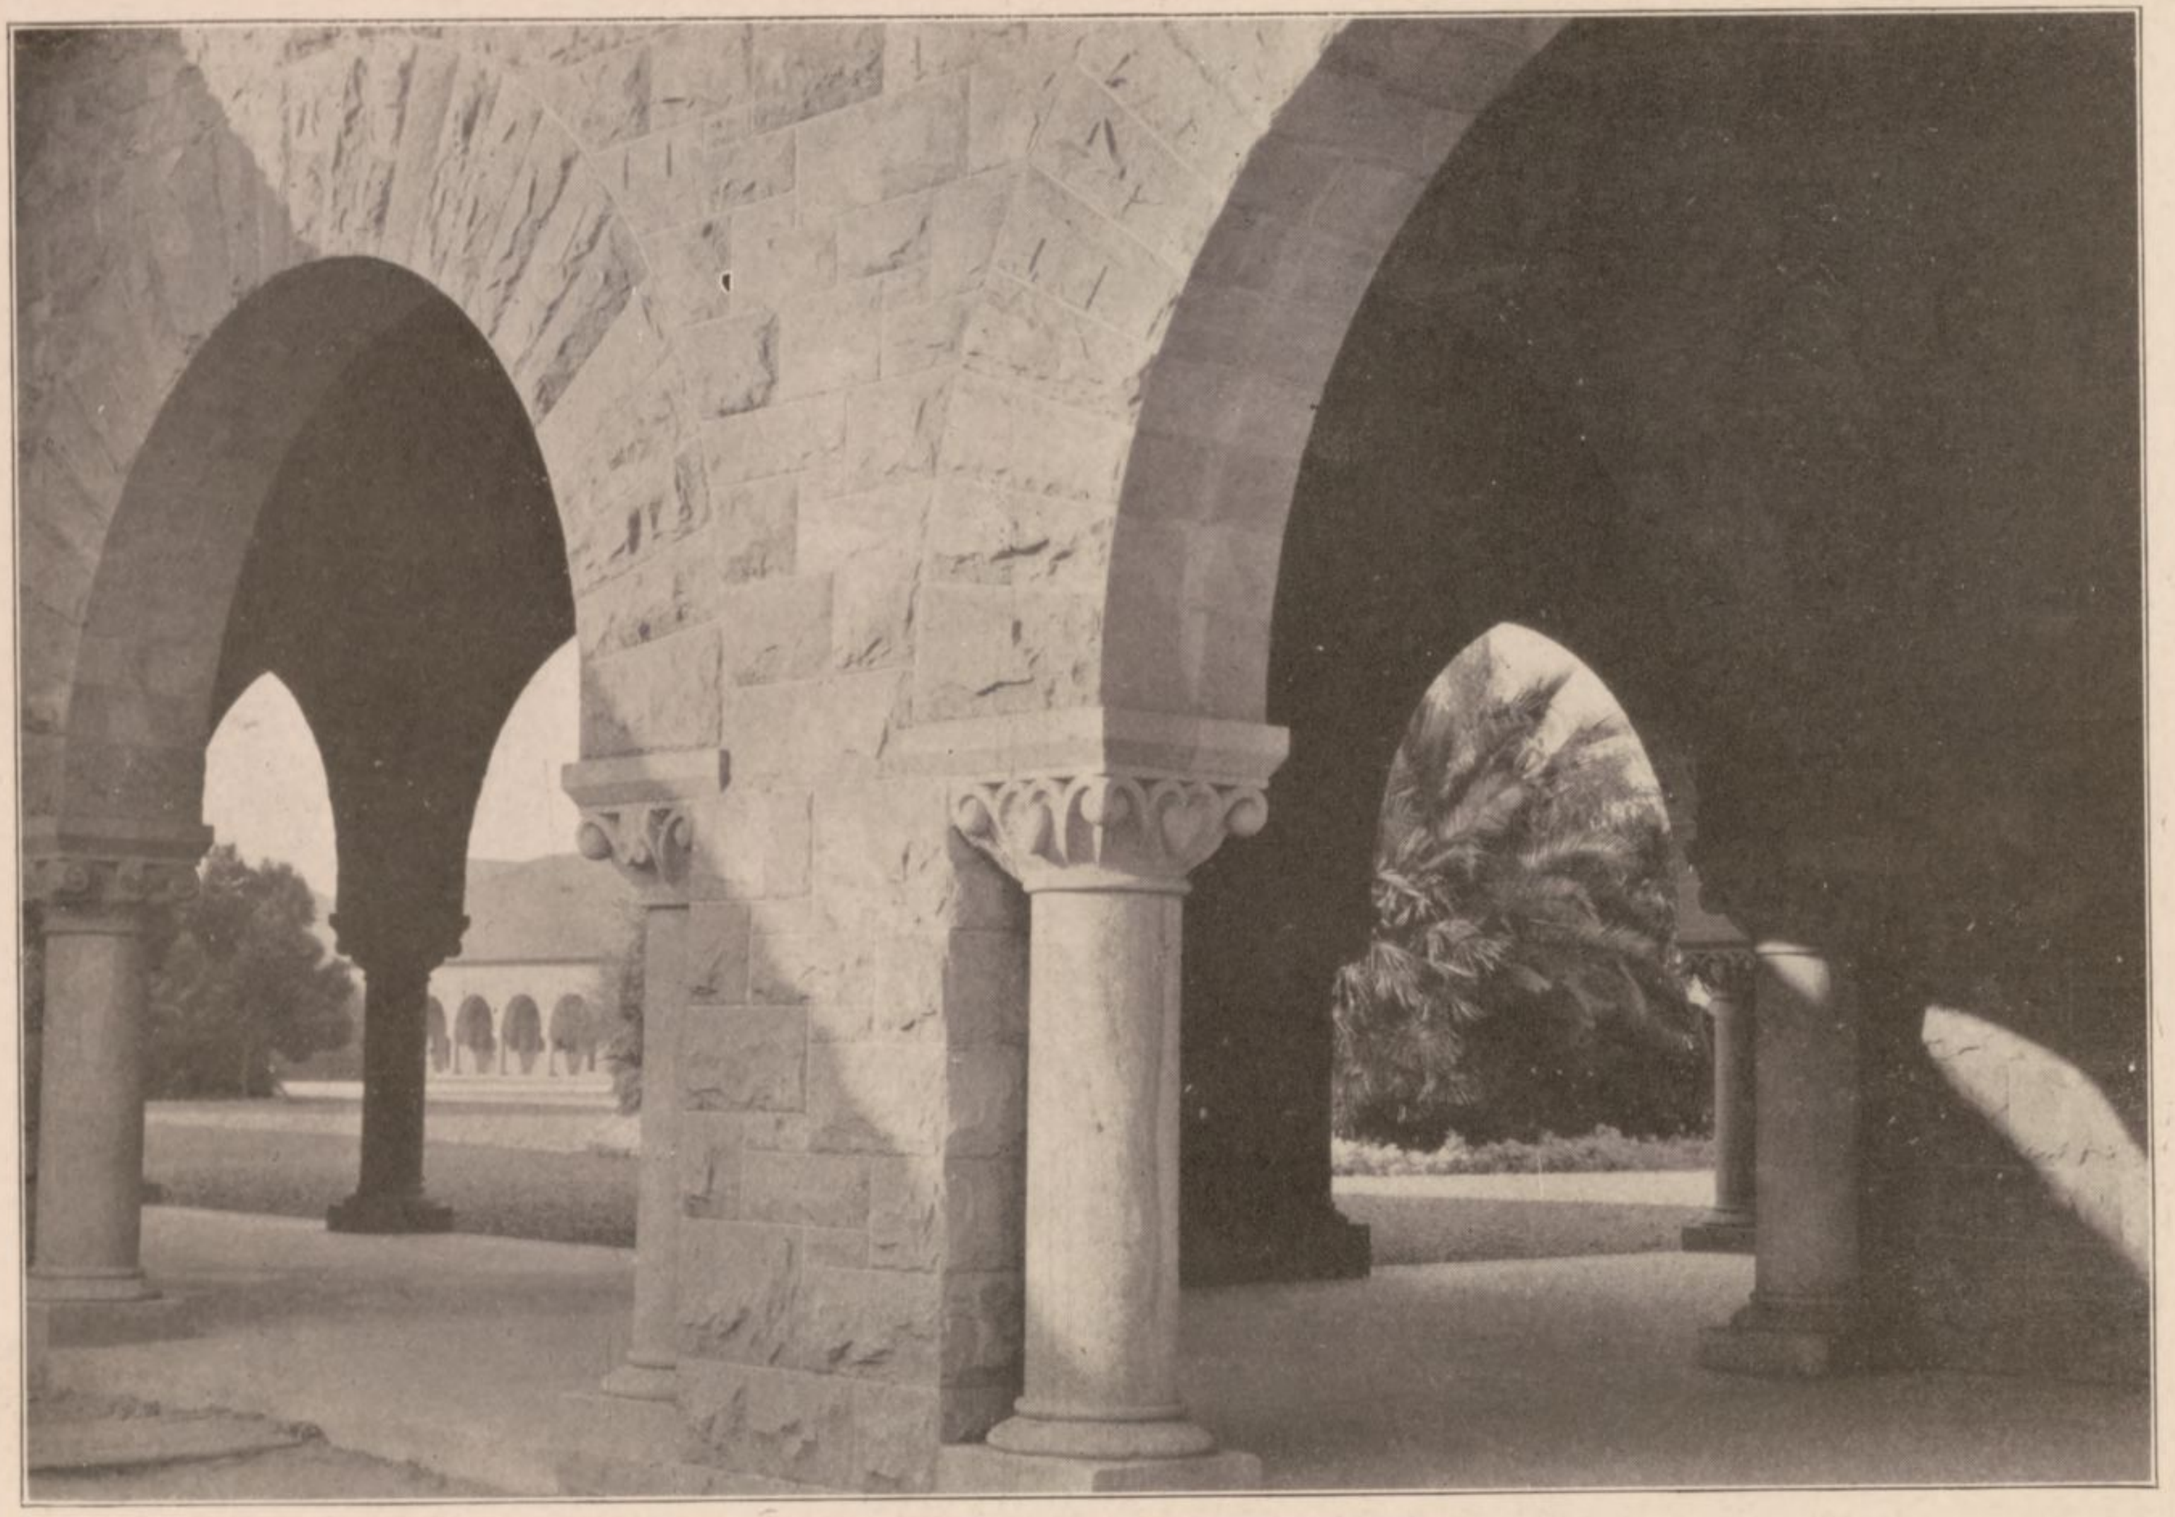
VIEW OF THE ALTAR IN THE RUINED MEMORIAL CHAPEL OF THE LELAND STANFORD, JR., UNIVERSITY.—It seems a strange fatality that the most destructive area in proportion to amount of territory covered should have included this magnificeat and costly university. Designed after the mission architecture. Over its portals was the inscription: "Erected to the glory of God and in loving memory of my husband, Leland Stanford." Behind the altar was a replica of the last supper from the original in the Sistine Chapel at Rome.

UNIVERSITY ENTRANCE GATE, OPPOSITE ARCHWAY.—Jane Lathrop Stanford, who with her husband, founded the university, was born at Albany, 1825. After Leland Stanford, Sr.'s death, she turned over to the University Trustees $18,000,000 in stocks her San Francisco residence, value $400,000, for a museum and art gallery; and 1,000 000 acres of land, value $12.000,000; raising the endowment to $45,000,000, and making the university the richest in the world. The ruined buildings will all be rebuilt as soon as possible.

CHEMISTRY BUILDING, LELAND STANFORD, JR., UNIVERSITY,—Begun 1900. The original structure consisted of a quadrangle of twelve buildings and a museum. In 1898 work was begun on the other sides of the quadrangle which were to be connected with the main court by a series of archways. The library contains 70,000 volumes exclusive of the law library.

MAUSOLEUM.—One of the finest pieces of architecture in America. Here beneath the massive pile rest the founders of the university: Leland Stanford, who died at Palo Alto June 20, 1893; his wife, who died at Honolulu, 1905, and their son, Leland Stanford, Jr., who died at Rome and for whose memory this great university came into existence.

ASSEMBLY HALL, LELAND STANFORD, JR., UNIVERSITY.— The university maintains 116 instructors and 1 600 pupils, and is co-educational, although in 1899 the number of women admitted in any one year, was limited to five hundred. It is governed by a board of twenty-four trustees elected tor life. This Hall was erected in 1899.



SECTION OF ARCHWAYS, LELAND STANFORD, JR., UNIVERSITY.—If there is one specially pronounced architectural feature of this wonderful university, it is the beautiful and extensive archways. Long vistas of semi-circular arches and interlacing segments lend a distinctive effect to the entire collection of buildings. The architecture of the structures is in the Mission style.

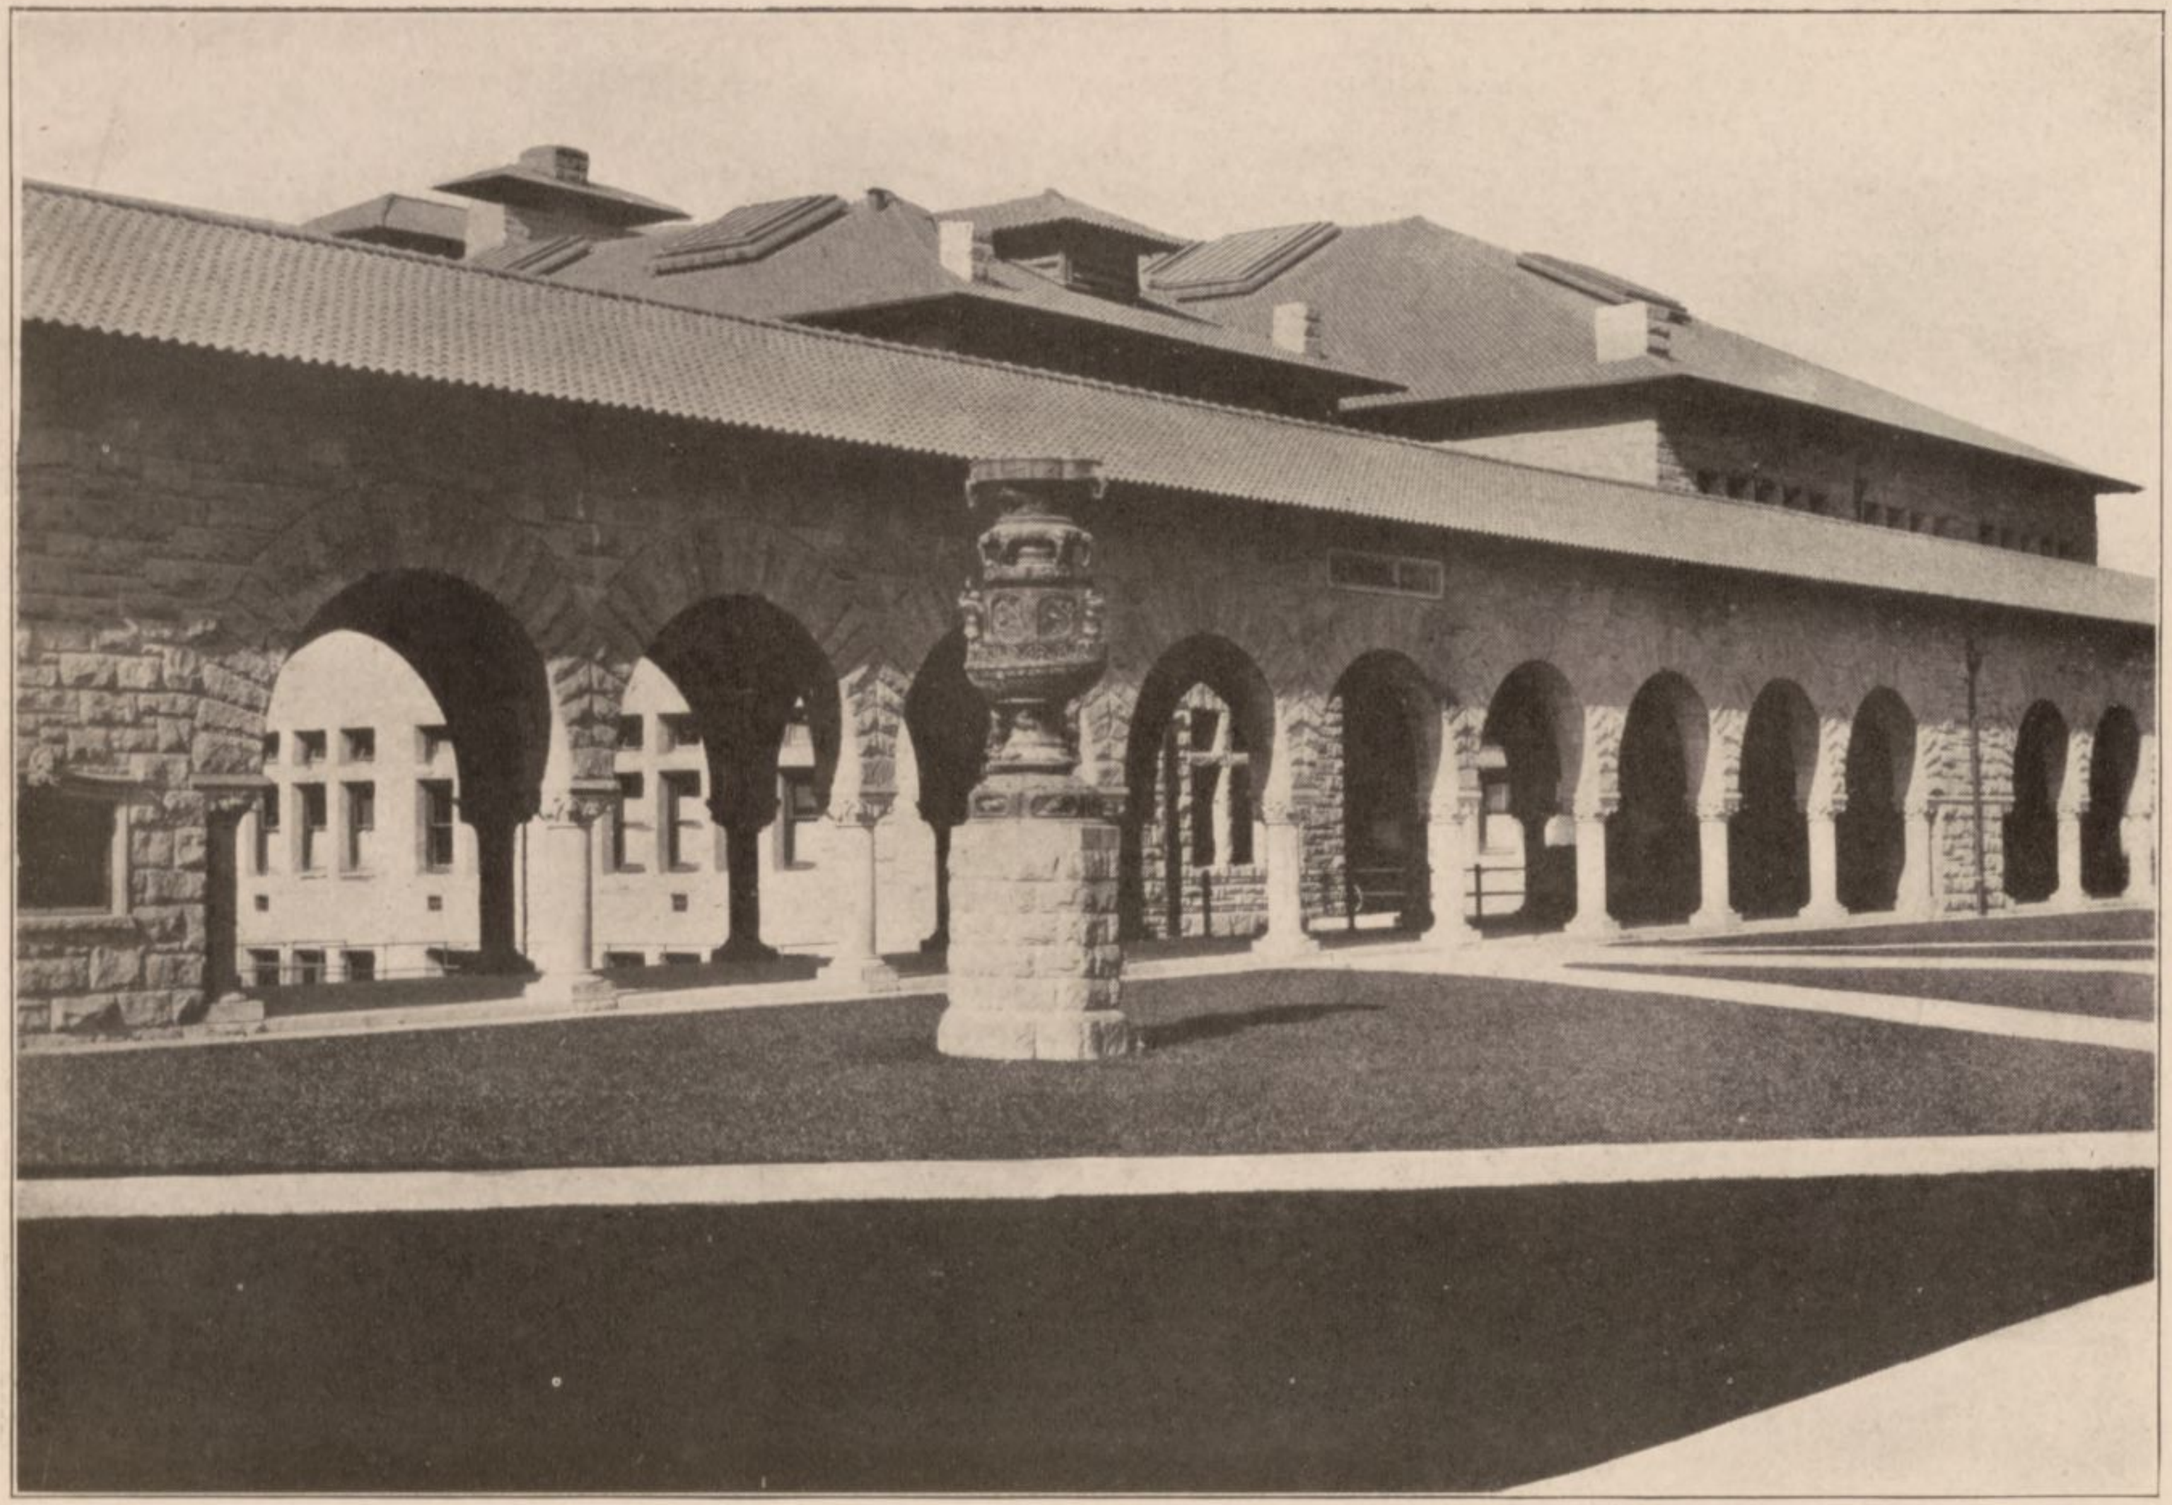
GYMNASIUM, LELAND STANFORD, JR., UNIVERSITY.—The corner stone of this massive structure was laid December, 1902. An expenditure of $200,000 is said to be sufficient to put the wrecked buildings in condition to open classes for the fall term, although permanent restoration will take years and millions of dollars. The gymnasium, church and library will probably not be rebuilt for several years.

WEEPING ANGEL.—One of the finest pieces of statuary in the west. Art, talent and money have not been spared in beautifying the spacious grounds and a memorial has been erected to the Stanford family that will continue to exist in the lives of its thousands of students.

MECHANICAL ENGINEERING BUILDING.—Erected 1905. Showing the tower of the Memorial Church. The ultimate aim of the university is supposed to be advanced research rather than a course furnished by the average popular college. The founder was especially anxious that the most thorough course should be offered in all the mechanical arts and the endowment for this purpose is most ample.

UNIVERSITY ENTRANCE GATE.—Two of these imposing archways open upon the spacious gardens and lawns of the university grounds. Leland Stanford, Sr., was born at Watervliet, N. Y., March 9, 1824. Moved to California 1852, to San Francisco, 1856. Was Republican governor of the state, 1361-3; first president Central Pacific R. R. 1891; U. S. Senator, 1885-1893. Endowed university $20,000,000. Died at Palo Alto, June 20, 1893. The Memorial church was erected to his memory by his devoted wife.

MIGLIAVACCA BUILDING, NAPA, CALIFORNIA.—Another view of this prominent building in ruins. Stone, brick and debris are piled on the sidewalk to a depth of three feet. The Goodman Banking Company were also located in this structure.



MEMORIAL COURT.—David Starr Jordan, LL. D., the present President, was installed 1891. The degrees granted by the university are B. A., B. S. and C. E. After resident post graduate work, the degrees of M. A., M. E. and Ph. D. are granted, but there are no honorary degrees.

PALO ALTO DEPOT, PALO ALTO, CALIFORNIA.—The site of the Leland Stanford, Jr., University, Palo Alto, was establishad by the university founder as a stock farm. It was here that Mr. E. Muybridge performed his noted experiment in 1880 with instantaneous photography, showing the condition of locomotion in various animals. The farm is now part of the university estate.

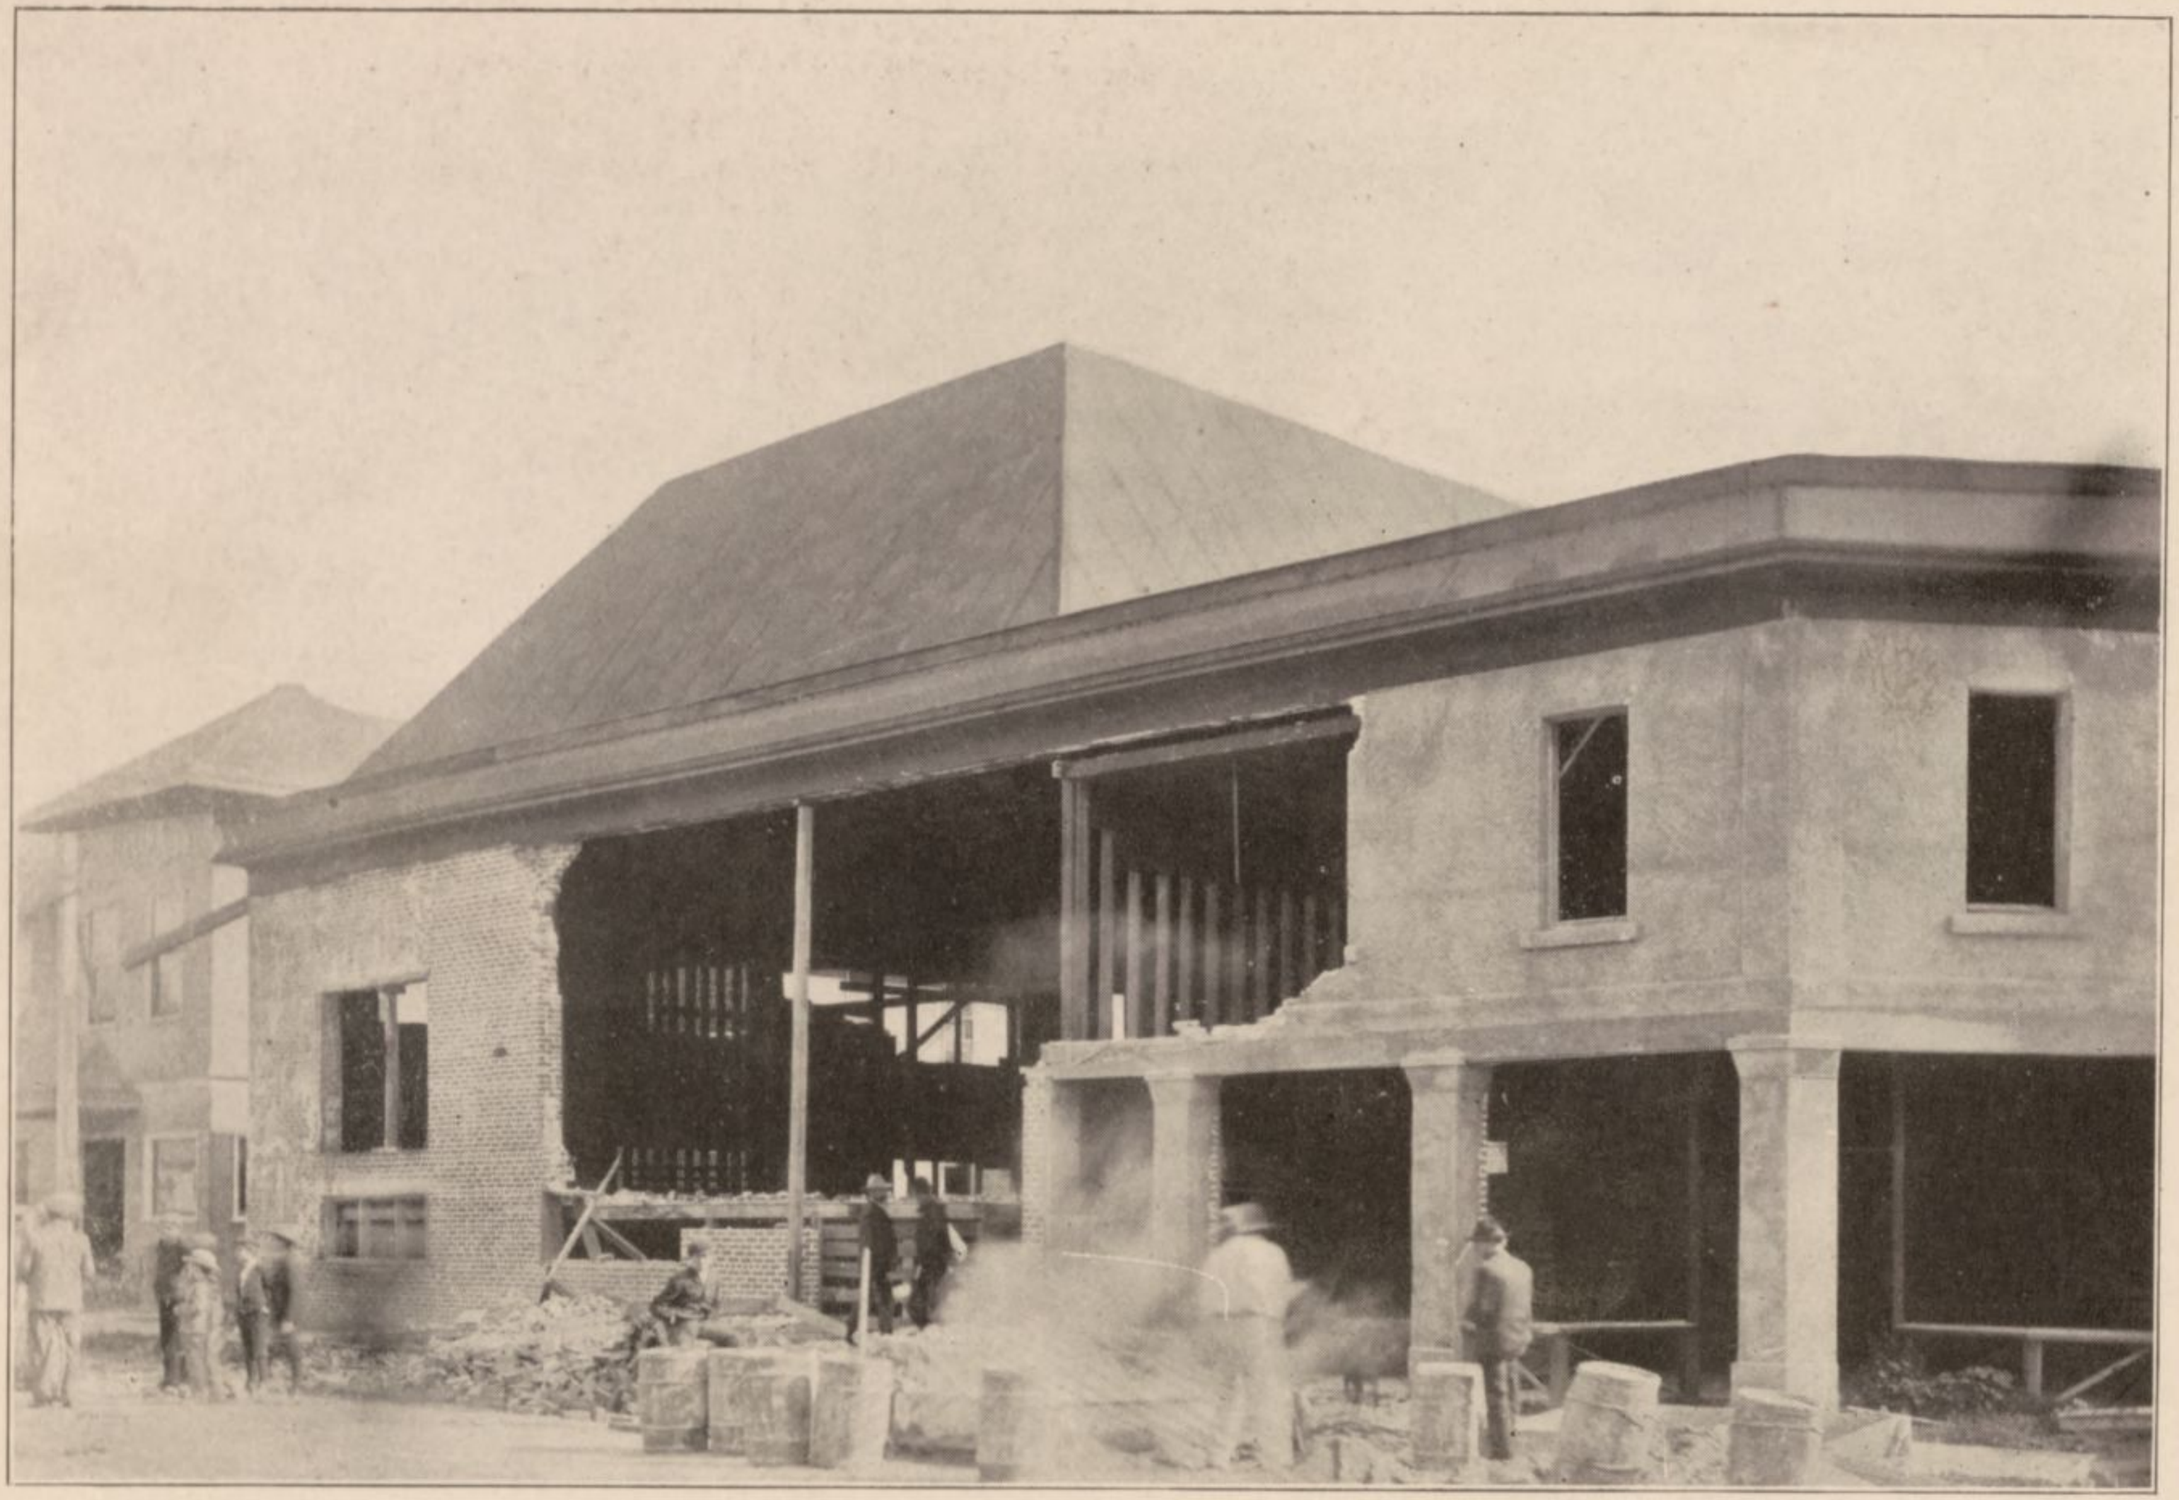
MEMORIAL ARCH.—The university was founded in 1884 by Leland Stanford and his wife in honor of their son, Leland Stanford, Jr., who died in youth at Rome. The corner-stone was laid 1887 at Palo Alto, three miles from the sea, near Monte Diable Mountain, thirty-three miles from San Francisco. Leland Stanford Jr. University is the richest institution of its kind in the world.

ANDERSON & DOUGHERTY'S PLUMBING AND TIN SHOP, MAIN STREET, SALINAS, CALIF. — An interior view, showing the twisted mass of tin, lead pipes and other material used in the shop. California has had over 417 earthquakes, over 200 of which have been recorded at the Lick Observatory.

109

RUINS, FORD & SANBORN'S STORE (DRY GOODS AND GROCERIES), SALINAS, CALIF. — This little city has a population of about 3,000. Over $2 500.000 worth of property was lost through the earthquake. Among the smaller towns which suffered Alameda with a population of 17,000 lost $400,000. Hollister. 1,900, $200,000, and one life. Santa Rosa, 7,000, $800,000, 300 dead. Loma Prieta, 300, 10 dead. Fort Bragg, 5,000, $100,000 and 5 dead. Montery, 3,500, $25,000 and 8 dead. Napa, 5,500, $250,000.

RUINS OF ST. PATRICK'S CHURCH, SAN JOSE, CALIF.—Totally destroyed. In this beautiful little city the postoffice was partly demolished, the Presbyterian Church and courthouse were wrecked, the Doherty block was burned, and nearly every business structure totally ruined. The Hall of Justice (cost $300,000) was also completely demolished.



NEW HAYES THEATER, NAPA, CALIFORNIA.—This beautiful structure, erected at enormous cost, was to have opened its gilded doors May first; but gilt and tinsel and mosaics are now buried in the debris of plaster and stone and brick. It may be necessary to tear down the remnant of wall now standing before this exquisite playhouse can be rebuilt.

A NAPA DRY-GOODS HOUSE, MAIN STREET.—Beautiful silks and delicate laces, expensive fabrics that delight the heart of every woman, are all buried in a heap of plaster in this well known store. By a peculiar freak of nature, the outer middle wall fell with a prodigious crash, presenting the peculiar spectacle of a roof without all of its supporting walls.

SANTA CATALINA ISLAND.—The Fairyland of the Pacific. A most beautiful and picturesque island owned by the two Banning Bros. Fifty miles from Los Angeles. Length, twenty miles. The home of yellowtail and tuna fishing. Some of these fish weigh 250 to 500 pounds. An interesting feature for all tourists are the glass-bottom boats which allow a view of the clear ocean below, with the wonderful green vegetation of nature and the colored fish swimming beneath the surface.
